Subject: Data Sheet for Permitted Emissions

CONFIDENTIAL COMMUNICATION

Debbie,

Here is the sheet I promised but I will need to have Karl complete the cells for FEP, and check the cells for PFA.

This is the confidential version and the names would need to be sanitized and some of the comments remove before we send this to the DAQ.

Karl,

Please see the attached sheet.

Please enter lb/hr and lb/yr numbers for permitted PM for the FEP sources and check the ones I entered for PFA.

One or more of your permits cited C-8 as being a VOC rather than as a particulate. Please enter limit for the category under which C-8 was permitted. I have already set the column header to show that it may have been identified as either category.

Please send the amended file to Debbie and send me a copy.

Thanks,
Chris Shoop
