RE: NESHAPS Notification of
Asbestos Removal - II
Du Pont - Victoria County, Tx.

Dear Mr. Stewart:

On May 11, 1979, we wrote notifying you of our intentions to dismantle some boilers containing Asbestos at our Victoria plant site. We would like to correct this notice as follows:

In this letter we stated that there were "four" 60,000 lb/hr Babcox and Wilcox steam boilers built in 1949-50. The correct number should have been "five". The rest of the letter is correct and the estimated amount of Asbestos (1000 square meters plus 1000 linear meters of coated pipe) was to apply to all five.

Dismantling work by Cleveland Wrecking Company is scheduled to start on July 9, 1979, and to take up to 90 days. Initially, one boiler will be completely dismantled. Depending on how this one goes, a decision will be made on whether to do the other four singly or altogether.

If you have any questions or require additional information, please contact me (512) 573-5111 Ext. 1277.

Very Truly Yours,

Andy Nickolaus
