ILLINOIS POLLUTION CONTROL BOARD PROPOSED REGULATIONS

Attached is a report on the meeting held last Friday with Mr. Harker of the Illinois Pollution Control Board staff, Dr. Colin Harwood of IITRI, Dr. George W. Wright and representatives of the asbestos industry.

Plans are being worked out for testimony, on behalf of the AIA/NA, at one of the three scheduled public hearings, probably the one in Chicago. Because of its interest in connection with the Waukegan Plant and the recent adverse publicity in the Waukegan newspapers, Johns-Manville will also want to be represented, as an individual company, at the Waukegan meeting. Details of these arrangements will be forwarded as soon as possible.

Bill
