SEP 13 1971

Larry,

Gérard Mitreau has received reports from the French Coal Mine Authorities on toxicity tests they carry out on the various fire resistant hydraulic fluids they are using. Copies of the documents concerned - translated by Gérard - are enclosed and I'm sending them to you to obtain your comments and also those of the medical department in St. Louis.

Gérard has a commitment to call on the French Coal Mines to discuss this problem by the end of September. Could we therefore have your input before then.

Many thanks.

A ARPINO

Dr. Kelly - Would you please review this and, as requested by Arpino, give me your comments. By comments I assume he means relative to whether we agree or disagree with some of the conclusions and statements herein. - Thanks
