Mr. Charles J. DeSimone
Pratt & Whitney Aircraft
East Hartford 8, Connecticut

Dear Mr. DeSimone:

In reply to your letter of October 11, I have enclosed a technical data sheet which describes our hydraulic fluid Pydraul 625. Enclosed also is a summary of animal toxicity data and the Medical Department's interpretation of the requirements for safe handling and usage of this fluid.

Pydraul 625 is a phosphate ester base fluid containing chlorinated hydrocarbons. Our label includes the following precautionary statement:

> "Caution! Contains chlorinated hydrocarbons.
> Avoid prolonged breathing of varpors or mists.
> Avoid contact with eyes or prolonged contact with skin.
> If skin contact occurs, remove by washing with soap and water. Following eye contact flush with water.
> If clothing becomes soaked with fluid, launder before wearing again."

If I can be of any further assistance, please do not hesitate to let me know.

Very truly yours,

Elmer P. Wheeler, Manager
Environmental Health
Medical Department
