D. A. OLSON

During our April 3rd meeting, the subject of modifying the labels on Aroclor packages was reviewed and Phocian Park offered to work on the appropriate wording.

He suggests the following paragraph be added to the existing wording:

> "This product contains polychlorinated biphenyls, which some studies have shown may be an environmental contaminant. Care should be taken to prevent any loss into the environment through spills, leakage, disposal, evaporation or otherwise."

and all products which contain any of these -

This additional wording is intended for packages containing Aroclors 1242, 1248, 1254, 1260, 1262, 1268, 4465 and Montars 1, 2, 3, 4 and 7.

Attached is a copy of a typical label. The proposed wording would appear in the space below the present printing.

We are anxious to make this change quickly. May I have your comments?

Bob Sido is arranging for the modification of Aroclor labels to include reference to PCB in the environment. When the new labels are available, will you see that the plants order their supply and immediately begin using them on new packaged Aroclors?

Bob is also preparing a supplementary label for placing on packaged material now in inventory. When these labels are available, the plants should make sure they are added to the package before shipping. Will you arrange with C. Sigler's group regarding supplementary labeling of packaged Aroclor in outlying warehouses.

Don Olson is checking with G.E. and Westinghouse regarding the modification of Pyranol and Inerteen labels. As soon as agreement is reached, Bob Sido will make the necessary changes.

The need for using the modified labels is urgent and we should make every effort to expedite this change.

P. S. PARK

G. ROBERT SIDO

Confirming our telephone conversation this morning, the following statement should be added to the labels on products containing PCB's.

> "This product contains polychlorinated biphenyls, which some studies have shown may be an environmental contaminant. Extreme care should be taken to prevent any entry into the environment through spills, leakage, use, disposal, vaporization or otherwise."

The above statement was given to me by Phocian Park.

Thank you.

Attached are layouts suggested for:

1. Modification of existing label inventories.

2. New product labels on these items.

3. A layout for distributor labels if they remain active.

Please let me have your immediate endorsement. We are determining what label inventories Anniston and Krummrich have and will arrange to over-print those, if possible, and provide new labels with the environmental precaution.

We have printed the environmental contaminant message on 2 inch x 3 1/2 inch pressure sensitive labels and these are now available. Please advise where these are to be sent for use on packaged goods. You should instruct these locations to place the label on the lower left corner of the product label on each container. This will relate the message to other label print in the same way we plan to over-print remaining label inventories.

G. R. Sido

CAUTION!

CONTAINS CHLORINATED HYDROCARBONS

Avoid prolonged breathing of vapors or mists.

Avoid contact with eyes or prolonged contact with skin.

If skin contact occurs, remove by washing with soap and water. Following eye contact flush with water.

If clothing becomes soaked with fluid, launder before wearing again.

This product contains polychlorinated biphenyls, which some studies have shown may be persistent, an environmental contaminant and, possibly, injurious to certain forms of bird, aquatic and animal life. Extreme care should be taken to prevent any entry into the environment through spills, leakage, use, disposal, vaporization or otherwise.

Contact your Monsanto Representative regarding reclamation of used fluid.

WASTE DISPOSAL

Used polychlorinated biphenyl fluids may be returned freight prepaid for proper incineration at 3¢ per pound.

A review of our inventory on 4-29-70 indicates about 6,000 units of packaged Aroclor products are now in various warehouses. These units will require a supplementary label which will contain the PCB statement we discussed. Will you arrange for procurement of the appropriate label to take care of this "one time" need?
