Arcolors

May 2, 1973

Mr. Donald R. Reed, Sr.
97 Irene Street
Buffalo, New York 14207

Dear Mr. Reed:

This refers to your letter of April 24 concerning the headaches you have had for some time. You asked me if I had any information that might help you to rid yourself of them.

I wish I had something positive to offer you. I have never heard of an individual having headaches after inhalation of Inerteen fumes either as used or after it has been subjected to a high voltage arc. It would appear that the only problem would be respiratory irritation and this should not be the cause of headaches.

I just am unable to help you and I can only hope that your symptoms may be relieved.

Sincerely,

R. Emmet Kelly, M. D.
Medical Director
