O. F. Stewart, W. E. Baker

The October dust counts from the various floors of the dry mill are tabulated below. There was a sweeper working on the 5th floor during the sampling period. Also, 406 screen was plugged during the sampling and was dusting quite badly. The third half deck, second and first floors looked quite clean.

The temperature was 50°F, wind was 3-5 mph from the west and the barometer read 30.22 during the sampling period.

	Dust Counts (mppcf)
Floor 6	11.1
Floor 5	6.4
Floor 4	7.2
Floor 3	5.0
Half Deck	11.4
Floor 2	7.0
Floor 1	5.2
