Re: **Paoli Railroad Yard PCB Litigation**

Dear Mr. Gierczak:

We received your DB17 Chromatograms regarding the tests done for Kohn, Nast & Graf,P.C., which we requested at the July 15, 1992 depositions. However, we did not find a Data Table showing correspondence to all calibrations and sample runs identifying with literature-established elution times for the DB17 column. We are attaching the corresponding page for the DB5 column which you previously sent us. We need this table for your DB17 column.

Very truly yours,

Michael H. Malin
