Northbrook, Illinois 60062

Dear Otis:

We have decided that it would be desirable to proceed with additional animals for interim sacrifice during the two year chronic studies with rats. This letter will authorize you to add the 300 animals at a cost of $12,000 in accordance with your letter of May 23, 1969.

Don Garbe called me last week and asked how we would like to take care of the accounting for the Aroclor studies. As indicated in my letter of April 15, I would like to keep our costs for the year 1969 to about $90,000. Since the Organic Division deposited $75,000 during December, 1969, we would like to be billed for the additional $15,000 about Thanksgiving time. On that basis perhaps Mr. Garbe would want to send us statements of our account in accordance with the suggested rate of expenditures as shown on the attached.

This plan is based on the scheduling of cost accompanying my letter of April 15; it now, of course, will have to be amended to include the additional $12,000. On the other hand, the $20,000 cost for the studies with mallard ducks will, I assume, be carried over into 1970.

Best personal regards.

Sincerely,

Elmer P. Wheeler
Manager, Environmental Health
