July 9, 1986

Denise Oleski, Ph.D
Northwestern University Medical School
W.G. Krummrich Study
215 E. Chicago Avenue, Suite 801
Chicago, Illinois 60611

Dear Denise:

I was able to locate an employee service record for
). It appears that she worked in department 236 from February 16, 1976 until she left the company on April 6, 1976.

According to my records, she was not included in either the exposed or the unexposed study population. Unfortunately, I could not find any employment information in our files when we were identifying these two study populations. The only hint that she even existed was the chloracne registry, but no one at the Krummrich plant could remember a former employee by this name.

Sincerely,

Terry L. Leet
Epidemiologist
