Safety Meeting for April, 1988

Construction Hazard Communications

The movie was about good communications on the job site. He talked about looking out for Number One. What safety steps should be used on the job site. Use all personal safety protective equipment. Watch out for changing conditions and bad weather, and know the location. Employees must work safely together and be cautious of falling, slipping, or flying objects. Use the correct respirator when working with toxic vapors. The speaker discussed the "M.S.D.S. (Material Safety Data Sheet) and the four hazardous factors - flammable, corrosive, toxic, and reactive. Workers should take hazards seriously.

Year-to-Date Safety Record

April 30, 1987	3 Recordable	0 Lost Time Accidents
April 30, 1988	2 Recordable	0 Lost Time Accidents

No lost time accidents for 19 months.

Things to Help Improve Safety

The asphalt between Building 130 and the High Pressure Lab needs to be replaced with concrete due to the large heavy equipment used when working on the roof.
