November 21, 1972

Mr. John Stockham
Goodyear Tire and Rubber Company
P. O. Box 799
Logan, Ohio 43138

Dear Mr. Stockham:

Confirming our telephone conversation this morning the Aroclor® 6062, which you indicated was present in a product purchased by your company from Midland Industrial Finishes, Waukegan, Illinois, is classified as a mixture of chlorinated hydrocarbons. As John Gannon indicated, Monsanto terminated the sale of this material in April, 1972.

I regret I have no OSHA Form 20 prepared for this obsolete product but I can offer the following toxicity information:

Acute Oral LD_{50} - Rat - mixed sex - undiluted. 8050 mg/kg. Classed as practically non-toxic.

Acute Skin Absorption Minimal Lethal Dose - Rabbits - mixed sex - undiluted. >7940 mg/kg. Classed as practically non-toxic.

Skin Irritation - Rabbit - mixed sex - clipped intact skin - undiluted. Classed as slight irritant. Ave. Max. Score 1.3/8.

Eye Irritation - Rabbit - undiluted. Classed as slight irritant. Ave. Max. Score 11.3/110.

Aroclor® 6062 is not considered hazardous as defined in 29 CFR Section 1501.2 which pertains to OSHA Form 20.

DSW 018864

STLCOPCB4005408

I hope this information is useful to you. If I can be of further service please let me know.

Sincerely,

W. B. Papageorge
Manager
Environmental Protection
