RE: Comments on Proposed Drinking Water Standards - PCBs

Attached for your review and consideration are some comments from Jim Rice, who is working with EEI on the overall comments. The document he refers to also is enclosed. We are trying to get the appendix and answers to the questions Jim raises at the end of item 3 on page 2.

Paul, Jim may have talked to you about this already. I suggest that if you have any questions or want to discuss anything with Jim that you contact him directly.

One substantive matter raised by my group concerned the early draft. Jim Rice will be criticizing EPA's use of a multiplier; therefore, we should be quite careful in how our PCB comments incorporate any use of a multiplier.

Finally, a request to Tim and Paul: if terms such as "homoscedastic," etc., are used in the comments, please give us untechnical souls a lay definition as well. Thanks.
