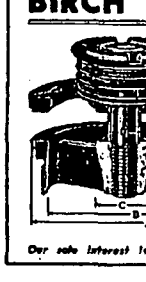
BIRCH PUMP VALVES



Have a metal back to withstand the pressure with rubber composition discs to seal the valve. Used for hot or cold water service, and increasing pumping capacity.

With installations from small boiler feed pumps with 8 valves to 1436 valves and units complete in individual pumps. Some city pumping stations have 7000 valves with years of continued service.

Railroads and large Industrial Corporations with chains of plants save pump overhead with "BIRCH PUMP VALVES". Why not yours?
