I finally received Xeroxes from the CRD Library of the articles discussed in Risebrough's bibliography. The only thing new was the J.A.O.A.C. publication and it's just a re-hash of the LKB release. Included is a copy of it. They are still making reference to an "in press" article in Acta. Chem. Scand. I have checked Acta. Chem. Scand., Vol. 1-10, 1967 and our library's most recent issues, Vol. 1-7, 1968 and there are no publications on PCB by Jensen and/or Widmark. I will keep checking as more current issues become available.
