Chicago, Illinois 60628

Dear Mr. Port:

In answer to your request for toxicity information on Therminol FR-2, the material attached to this letter I am sure will suffice.

While I was talking to you you mentioned FR-66. This is not a chlorinated fluid and would, therefore, not pose the exposure problem of FR-2 but it is flammable.

Sincerely,

J. T. Garrett, Manager
Industrial Hygiene and
Pollution Abatement
