Subject: Definitions - Consultant - Asbestos Date: July 16, 1979

Discussed this topic with Mr. Ian Stewart of McCrone. He agreed that definitions were indeed a problem, but felt the only one we could go with was the definition of asbestos published in the Federal Register.

His suggestions for consultants were Paul Gross - Industrial Health Foundation, Dr. Clark Cooper, and Dr. William D. Smith - Health Research Institute - Fairleigh Dickenson University. First choice would probably be Smith. Gross apparently somewhat controversial and Dr. Cooper's attitude that asbestos isn't a serious problem would detract from his usefulness.
