BILT-IN-WALL Heaters for Homes and Offices

These heaters fan-circulate warm air at floor level for greater comfort and improved heating efficiency. Quick and easy to install. No ductwork required. Heating element lasts a lifetime and eliminates all danger of fire, shock or burn. Available in capacities from 1500 to 4000 watts and with manual, wall thermostat or built-in thermostat control. All have thermal safety switches. Silver gray enamel finish.

BILT-IN-WALL SMALL-ROOM Heater

Designed to build into the wall, this 115 volt, 1320 watt heater is designed for small rooms such as baths, bedrooms, kitchens, etc. Employs the famous lifetime heating element that is completely safe. Available with or without built-in thermostat. Thermal cut-off prevents overheating. Two-way switch permits use of fan without heat. Available in white baked-on enamel or chrome.

UNIT HEATERS for Auxiliary Warmth

These fan-circulating units are used as auxiliaries to a main heating system, or where electric rates permit, as main heat sources. They require no plumbing, or ductwork—only circuit wiring. Like all Electromodes, they employ the completely safe lifetime heating element that has no exposed hot or glowing wires, gives high thermal conductivity and resists corrosion. A safety cut-off prevents overheating. Thermostat control available on all models.

Suspension Type (left above) for wall or ceiling mounting in factories, stores, offices. 10,000 to 45,000 watts.

Combination Portable and Suspension Type. Plug in where needed or mount permanently. 1500 to 7500 watts.

Explosion-Proof Heaters (left) for areas charged with inflammable vapors. Convection type. Entire electrical input provides useful heat. Three models range from 2000 to 6000 watts. Listed by *Underwriters' Laboratories* for Class 1-Group D Hazardous Industries.

Engineering help is at your disposal. For more information, see your supplier or write Dept. HVG-10, Electromode Corporation.

Electromodes are approved by *Underwriters' Laboratories* and are fully guaranteed.

Fedders-Quigan Corporation

57 Tonawanda Street
Buffalo 7, N. Y.

Heat Transfer Specialists since 1896

Manufacturers of Convactor-Radiators, Wall Radiation, Baseboard Radiators, Unit Heaters, Railroad Car Convectors, Unit Coolers, Refrigeration Coils, Air-cooled Fin and Tube Condensers, Clip-on Thermometers, Room Air Conditioners, Automotive Radiators, Car Heater Cores, Electric Water Coolers.

A Great Name Since 1896

FEDDERS SERIES 15 HORIZONTAL UNIT HEATERS have capacities of 100 to 1,000 EDR. Handsome, rugged cabinets, with latest type broad blade fans provide large air volume, quiet operation and high efficiency. Write for Bulletin 15C-4.

FEDDERS SERIES 16 DOWNBLOW UNIT HEATERS have capacities of 155 to 2,050 EDR. Designed for applications necessitating clearance for material handling equipment, tall buildings and other conditions which require piping to be kept out of the way. Write for Bulletin 16C-1.

FEDDERS TYPE F CONVECTOR-RADIATORS

Designed for installation in homes, apartments, offices, institutions and other locations. They can be used with steam, and forced or gravity hot water systems.

Heating element has copper tubes and aluminum fins assuring efficient heat transfer and prompt response to manual or thermostatic control.

In addition to Type F stock models, Fedders offers a complete line of Convactor-Radiators for special applications.

Write for catalog giving complete data.

FEDDERS WALL RADIATION

Well adapted for industrial, commercial, institutional and household use. Cold drawn, seamless steel pressure type tubing is bullet expanded into self-spacing, collared, die-formed steel fins.

Cabinets available in expanded mesh or solid front with flat or sloping top with die cut grille.
