Mr. George Friebel
Sager Glove Corporation
700 North 4th Street
Murray, Kentucky 42071

Dear Mr. Friebel:

The consultative health survey conducted at the Sager Glove Corporation, on April 8, 1981 and September 24, 1981, found no violations of Kentucky's occupational health standards. Please keep in mind that our survey did not include your entire operation. Since health conditions in any facility are apt to change daily, our findings are based strictly on conditions which existed at the [illegible] the survey was made. While our survey was conducted as thoroughly and professionally as possible, you should understand that in the event of an occupational safety and health inspection, our findings are not necessarily binding on the Compliance Officer (CSHO).

We commend you for your positive attitude relative to occupational safety and health and for your efforts to comply voluntarily with the provisions of the Kentucky program. At the same time, we encourage you to ensure continued compliance. Feel free to contact us if we can be of assistance in this on-going process.

Thanks again for your interest in the Kentucky Occupational Safety and Health Program and in our voluntary compliance services.

Sincerely,

Larry W. Potter
