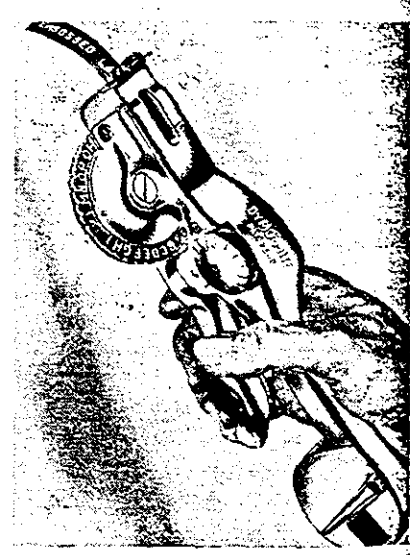
12-, 48-, 125- or 250-v dc or 12- or 240-v ac. It can be manually operated. Interlock switch prevents motor from operating when hand crank is engaged.—S&C Electric Company



Hand embossing tool identifies pipes

26 • Lightweight aluminum tool for labeling and identifying electrical circuits, pipes, meters, panels and controls is quick and economical. You just dial letters and press handle to emboss. Built-in cutoff blade trims finished label to exact size. Embossing dies give sharp raised letters.—Dymo Industries, Inc

Just circle key numbers on the Reader Service card, page 101, to get complete product story

Control cable has polyethylene insulation

29 • Cable with chemically cross-linked polyethylene insulation is for general use in air, conduit, underground ducts or for direct burial. Thermosetting insulation combines electrical with thermal properties.

Cable can be spliced and terminated in same way as any other thermosetting type. Available in 600- or 1000-v rating with two through 12 conductors.—General Electric Company

Portable sump pump

51 • Self-contained pneumatic sump pump needs no priming to handle sewage, sludge, chemicals, oil or water. Body, impeller and strainer are bronze. They resist corrosion and also provide sparkless operation, pumping inflammable or explosive liquids safely, according to the manufacturer. Pump stands 19⅜-in. high, fits through a 10 x 12-in. hole. Speeds: 3200 to 3600 rpm, depending on head and air pressure.—Schramm, Inc

Lancing powder now comes as uniformly sized mixture

58 • Uniformly sized, intimately mixed powder carries heat from flame to cut without heat loss, maker claims. Powder is made up of iron and aluminum particles from 0.01- to 0.05-mm diameter, blended and mixed for efficiency and protection against lance burnout. It's available ready-mixed in 100-lb drums.—Linde Company
