Mr. J. W. English, Plant Engineer,
American Smelting & Refining Co.,
P.O. Box 1111,
El Paso, Texas

Dear Sir: Blast Furnace and Ventilating Baghouse

Enclosed find print of letter from Plant Rubber and Asbestos Works regarding insulation work.

The Insurance Company has insisted on all recent jobs that the underside of the Baghouse roof be protected with 3/16" Flexboard attached to the T&G sheathing with monel screws. Our drawings will call for this and I would recommend including it in the contract which you let for the concrete baghouse. Probably the local Johns-Manville dealer will be able to handle this for your contractor.

The Marine Engineering & Supply Company of 941 East 2nd Street, Los Angeles, California did the work for the Los Angeles baghouse.

Yours truly,

C. C. Burt
