be planted ibber. This tool with a h is stabbed twisted, a than using

arefully in ttle plants set two or remember the size they will attain at maturity and see they have room enough to develop their best.

Vigorous growth in seedlings will be assured if plant food is applied while they are small. It will enable them to develop a good root system, which will feed them well. In transplanting vegetables mix thoroughly one level tablespoonful of complete plant food with the soil in the bottom of the hole before setting the plant. Then apply plant food over a radius two feet from the plant at the rate of one rounded teaspoonful to each square foot of ground.

Four to six weeks later another application of plant food at the rate of two pounds per 100 square feet may be made. This is equivalent to a rounded teaspoonful for two square feet. Apply evenly over the soil surface except that immediately adjacent to the plant.

Discussed By Grove Board

Remodelling of Scout Hall, Summer Sports, Baseball and Budget

Summer, school vacation, night softball season and city budget making time are in the air, so that the Pacific Grove recreation commission had a busy time last night. With full attendance, the commission met at Surf Board Inn, Lovers' Point, Chairman C. F. Curry presiding.

Rehabilitation of the Boy Scout hall, long considered and now in line as the city's next recreational project was discussed. It was revealed that plans are being drawn by a local architect and will be ready in about two weeks.

BASEBALL MEETING

The night baseball park will be put in shape immediately for opening at the end of next week for night practice. Teams should sign up with "Nap" Easterbrook at once. There will be a team managers' meeting next Wednesday night at the high school gymnasium. Important rulings will be made.

An increased recreational budget will be sought from the city next year. Two budgets will be presented, one for carrying on with WPA assistance, and one for carrying on without it. But regardless of plan, the present budget is declared inadequate.

Although considerable help has been received by Pacific Grove from the WPA, there has been considerable friction, as the city has always attempted to direct its own program, merely availing itself of WPA help, whereas the WPA director has sought a separate program. Easterbrook has developed the Grove program, however, so that it can carry on at any time with city recreational staff alone.

The commission last night also discussed a summer sport program for the Fourth of July week end, regardless of whether or not the Open House celebration is held. Diving and swimming exhibitions and contests may be held on Saturday, July 2, and Monday, July 4, at the pool. Monterey is having its soap box derby on Sunday, July 3, with Grove club members assisting in sponsorship and Grove youngsters participating.

NEW YORK STOCKS

NEW YORK, Apr. 27 (AP). — Gains of fractions to about 2 points —reversing a slow decline the last few sessions—were held in face of apathetic buying, on the stock market today.

Trading dwindled after an early spurt in orders and transactions again footed up to only about 450,000 shares.

Public interest seemed to have been stimulated overnight by the pledge of a group of prominent business men for cooperation with the administration on recovery efforts. Professional traders, however, were content to wait for more tangible reassurance improving sentiment and business confidence would be translated into production gains.

Quick to respond to buying, although early gains were pared before the finish, were U. S. Steel, Bethlehem, International Harvester, American Can, Eastman Kodak, Douglas Aircraft, Johns Manville, Du Pont, International Nickel, Consolidated Edison, United Aircraft, Standard Oil of New Jersey, U. S. Rubber preferred, and Cerro de Pasco.

Artists Urge Colored Roof

That the recent development of color in roofing is one of the most significant steps in American home building in many years is the statement of Dean Cornwell, famous New York mural painter.

"The American suburb today is a much more attractive place than it used to be," he declared. "A great deal of that charm has come in the introduction of tastefully chosen roof colors. We who paint naturally welcome any new trend toward beauty in America. And beauty in the home is the most beneficial of all."

A survey of modernized homes, selected at random, indicates how true that is. Whereas the old-fashioned shingle was usually of a dusty neutral color, the new type of shingle, with the mineral-surfaced asphalt shingle predominant, is being used in a variety of colors.

The choice of color in asphalt shingles depends to a large extent upon the type and architectural lines of the house. The white Colonial home, for instance, would look queer if roofed with shingles of intermingled colors. On such a home, subdued colors are preferable. But on other types of homes, roofs of red, or blue, or brown give the home a distinctive and attractive appearance.

The fire-resistant quality of the new types of roofing is an important factor in their constantly widening use. More than 500 cities and towns in the United States require by ordinance that fire-resistant roofing be used. But even in those localities where fire-resistant roofing is not required by law, home-owners have found it wise to apply such roofing material both on new structure and in

heating and sheet metal work and Thomas French of New Monterey the glass.
