- GENERAL INFORMATION -

PURPOSE: This Manual provides the official coding and descriptive information for all products that the Building Materials Roofing & Vinyl Groups sell.

RESPONSIBILITY: Department BRMP.

ORGANIZATION: The Manual is organized into three sections:

1. General Information: Explains the Manual itself.
2. Products: Lists all products alphabetically by merchandising category and product class.
3. Tables: Each table that is referenced in the Product Code Manual is contained in this section. The first page of the section is a table index.

MAINTENANCE: It is the responsibility of Division Offices to notify BRMP of changes in product codes including additions and/or elimination of new products, sizes, and colors initiated at the Division level.

Any changes to the Manual will be made by BRMP and distributed to all persons on the distribution list.

NOTE: For discontinued products, sizes or colors, the product codes will remain in the Manual as long as the product is still on inventory.

DISTRIBUTION: The Product Code Manual is issued to persons on the Product Code Manual distribution list. If there is a change in distribution or a need for a person to be added to the list, notify BRMP.

VINYL SIDING TRIM J CHANNEL	12 JNV J CHANNEL	SIDACC	CT	4002	022	C	12JNV	41	41	41

MERCHANDISING CATEGORY: A code grouping products into broad product lines. This code is assigned by the Merchandising Manager.

DATE: The issue date of the page.

PREV: The previous issue date of the page.

CLASS: Within the category, class refers to a group of products that are similar as defined by the the class description.

ACCESS ABBREVIATION: An alphabetical code used to identify a product in the 'BASIS' system. This code corresponds to and is used instead of the 4-digit product code.

BILLING UNIT: The unit of measure that the product is sold in and which appears on the invoice.

PRODUCT CODE) A 7 digit code
COL/SIZE) uniquely identifying the product with the exception of siding accessories (see AUXILIARY CODE).

COL/SIZE: A code usually identifying the color or size of a product.
'***' in this column indicates that the product is sold in different sizes or colors. The type of Col/Size used with the product is listed in the '***' TABLE' column.

The valid size codes are listed below the '***' for those products that are sold in different sizes.

AUXILIARY CODE: The "AUX" code, if present, is used to indicate that the product described cannot be identified uniquely without additional information. A "C" means that a color must be specified in addition to the product code.

TABLE: If the Col/Size entry for the product is '' then the entry in this column identifies the type of Col/Size code. The specific Col/Size codes are listed in the corresponding table.

ABBREVIATED SIZE DESCRIPTION: If the Col/Size entry is not '***' the entry in this column describes the Col/Size code.

COMMISSION CLASS: Defines the commission class for each product by type of selling division:
(1) Roofing Division.
(2) Vinyl Division.
(3) Distribution Centers and all other types.
