Dear Lee:
Dear Ed:

This is to acknowledge receipt of your letter of June 25 accompanied by a black and white proof of the caution label we now require for our five-gallon pails.

I would like to have you contact Cleveland Steel to reduce the quantity of decorated plate from 150,000 to 100,000. This is for two reasons——first, our business is at low levels at the present time, and second, there is a possibility we will be able to eliminate the use of asbestos in our formulas, and we would not like to have this caution label with us for too long a period if it were not necessary.

Thank you very much.

Very truly yours,
THE MASON COMPANY
