A I have no opinion.

Q You do -- it is your opinion, is it not, that mesothelioma can be caused by very small amounts of asbestos, such as the amounts brought home on the clothes of workers who work with asbestos?

A I am not so sure when we talk about insulators. The amount of asbestos brought home by a worker would be small.

I don't think we can label it as small.

Q Well, you do agree, do you not, that children of asbestos -- of people who bring dust home on their clothes, asbestos dust on their clothes, and spouses, wives or husbands of workers that bring asbestos dust home on their clothes develop mesothelioma many years later, just from the dust that is brought into the household that way?

A What I am saying is that the amount of dust brought home may not be that small.

Q Well, you agree it is a heck of a lot smaller than what is in the workplace, don't you?

A It is less than shipyard, but less than
