SUBJECT OPPORTUNITY FOR MONTARS

REFERENCE

TO :
Dr. R. E. Keller
W. R. Richard
Scott Tucker
W. F. Wayehoff
→ R. Wheeler

CONFIDENTIAL

It is always pleasant to see a contribution towards new opportunities for our products. The attached came from Bill Niemeyer of Anniston. In view of our current program because of Department of Wildlife activities, it may be a mixed blessing unless Montar 9 can be used. Certainly I think we should stay away from Montars 1 and 5. Montar 9 being non-chlorinated polyphenyl might be worth pursuing as long as we are confident we won't run into future troubles.

I'll thank Bill but hold off on doing anything more until I hear from you.
