(B.N.A. NEWS 3/28/74)

If you refer to the captioned reference, you'll see we have a whole new area of concern with asbestos. This will affect the Carpenter, Labor, and Paint crafts particularly (150 - 175 men). It is not likely we will get an economical substitute for this material too quickly. (It is still in the 5 - 6 cents per square foot price range).

It is our intent to temporarily place this material among those requiring asbestos control procedures. If you have any thoughts on this, or if you know of any activity for substitutes, we will appreciate your comments. Apperently, the hazard lies in the joint compound and its use. We will seek suitable substitutes which should be available.
