thanx
Don

This will confirm our January 29 telephone conversation concerning Johnson Motors' future requirements for PYDRAUL A-200. Johnson Motors has now approved shipment of blue colored PYDRAUL A-200. Effective immediately, any PYDRAUL A-200 shipped to Johnson Motors will be the blue material.

By copy of this memo, it will no longer be necessary to maintain bulk stocks of undyed PYDRAUL A-200. Would you please adjust future PYDRAUL A-200 production schedules so that all material produced at the Krummrich plant will be blue material. If it is feasible you might want to add the correct quantity of blue dye to present bulk material to assure uniform shipments to Johnson and other bulk customers in the future.

D. F. Smith
