PCB Controls 9/26

Art:

Losses from dept and incinerator continue under 1 #/day @ 0.75 #/day

at Waste Treatment Plant

	Influent	Effluent
9/3	7 #/day	1 #/day
9/6	3	1
9/10	6	1
9/13	14	4
9/17	2	1
9/20	12	6
9/24	3	2

A slight upset twice this month but average is decreasing.

As you know Feds sampled 24 hr period from midnight 9/20 to midnight 9/21

DSW 296041

I believe they took 17 different samples. We also received 17 samples. Something is wrong with method of sampling (I think). Our analysis of PCBs ... one of the samples analyzed equivalent to 81# at Waste Treatment Influent & 10# Effluent

I will check further but Heisler and Feds were not sampling for PCB

[illegible]
