Monsanto

MONSANTO COMPANY is a diversified producer of chemicals, plastics, agricultural products, man-made fibers, and specialized electronic and process control systems. The company has investments, either directly or through affiliated companies, in 150 manufacturing plants and 31 laboratories or technical centers in 20 nations.

MONSANTO AGRICULTURAL PRODUCTS CO.

This operating unit serves agricultural markets through six major business areas: herbicides, insecticides, plant growth regulators, fertilizer materials, blasting products and hybrid breeding animals. Monsanto crop chemicals, used to control many annual and perennial weeds in major crops such as rice, wheat, corn and soybeans, include *Lasso*®, *Ramrod*®, *Roundup*®, *Avadex*®, *Far-Go*® and *Machete*® herbicides. Insecticides based on parathion manufactured by Monsanto also protect feed and fiber crops around the world from destructive pests, such as the boll worm and boll weevil in cotton. *Polaris*®, which assists cane producers in maximizing yields by increasing the sucrose content of sugar cane, is the first of a family of plant growth regulators under extensive investigation by the company. Monsanto is also one of the world's largest suppliers of ammonium nitrate. While its high nitrogen availability and ease of use make it attractive as a fertilizer, ammonium nitrate also goes into efficient low-cost blasting agents used extensively as mining and construction explosives. The company's work in the animal genetics field is conducted by Farmers Hybrid Companies, Inc. of Des Moines, Iowa, a wholly-owned subsidiary, which is a world leader in developing and marketing improved strains of meat producing animals with its *Boar Power*® boars.

MONSANTO CHEMICAL INTERMEDIATES CO.

This operating unit of Monsanto covers three basic business areas: petrochemicals, process chemicals, and textile intermediates. Major products include styrene, acrylonitrile, phenol, chlorobenzenes, dibasic acids, chloralkali, phosphorus intermediates, elemental phosphorus and industrial acids. These chemicals are used as key raw materials in the manufacture of plastics, fibers, synthetic rubber, agricultural chemicals and thousands of other consumer and industrial products. The company also maintains an extensive research and development program directed at increasing its eminent position in manufacturing technology. As a result of its successful R & D program, the company's technology is licensed around the world.

MONSANTO INDUSTRIAL CHEMICALS CO.

This operating unit serves a broad range of markets through six business areas: detergents and phosphates, electronics, environmental products, plasticizers, rubber chemicals and specialty chemicals. Detergents and phosphates include products used in cleaners, foods and dentifrices, while electronic products are supplied to the semiconductor industry. Monsanto Enviro-Chem Systems, Inc., a subsidiary, develops, markets and installs systems to control air pollution and is a world leader in the design and construction of sulfuric acid plants. Plasticizers add flexibility and other desirable properties for vinyl packaging film and sheeting. Through its rubber chemicals business the company is one of the world's leading suppliers of chemicals used in the manufacture of rubber products. Specialty chemicals include pharmaceuticals, intermediates, food ingredients, functional fluids and water treatment chemicals.

MONSANTO PLASTICS & RESINS CO.

This operating unit is composed of three divisions—Plastics, Resin Products and Fabricated Products. Products within the Plastics Division include *Lustran*® ABS, *Lustran*® SAN and *Lustrex*® polystyrene, three styrene-based plastics used in a variety of household, construction and appliance applications. *Vydyne*® nylon and *Vydyne*® R reinforced nylon are used in the electrical, appliance and transportation industries. *Fome-Cor*® board is used as sheathing in manufactured housing, for headliners in automobiles and in the graphic arts industry. The Resin Products Division produces *Saflex*® polyvinyl butyral film, the plastic interlayer used in automotive windshields and laminated architectural glass, and specialty resins for paints, coatings, adhesives and paper. Included in the Fabricated Products Division are custom designed and stock blow-molded containers, polyethylene film for greenhouses, *AstroTurf*® recreational surfaces and *Spray Guard*® rain flaps for controlling splash and spray from large vehicles on wet pavement.

TOWOLDMON0042303
WATER_PCB-00033349

MONSANTO TEXTILES COMPANY

Nylon, *Acrilan*® acrylic, modacrylic and polyester fibers are manufactured by this operating unit. These man-made fibers serve apparel, hosiery, home furnishings, carpet, and tire markets. Increasing quantities of Monsanto fibers are sold to the apparel and home furnishings markets under the *Wear-Dated*® warranty. *Acrilan*® acrylic, a recognized leader in the field of carpet fibers, and *Ultron*® nylon with antistatic and soil-hiding properties, are preferred by quality mills. In many fabric constructions, *SEF*® modacrylic fiber meets the rigid flammability standard for children's sleepwear. *Cerex*® spunbonded nylon fabric is used as a durable scrim for carpeting and in quilted fabric liners air and liquid filters, and disposable hospital garments. *Bidim*® polyester nonwoven fabric, a civil engineering material, is used extensively for soil stabilization and drainage for road building, rail track beds, heavy work sites and soil drainage.

INTERNATIONAL DIVISION

Monsanto's International operations serve world markets through sales offices or sales representatives in 68 countries selling to customers in 123 nations. Monsanto International coordinates operations outside the United States in conjunction with the five operating companies. Ex-U.S. operations have been divided into three world areas: Europe-Africa, with headquarters in Brussels, Belgium; Canada-Latin America; and Asia-Pacific.

FISHER CONTROLS CORPORATION OF DELAWARE

This self-contained company, jointly owned by Monsanto Company and The General Electric Company Limited (GEC) of the United Kingdom, manufactures automatic control equipment and valves and markets to the worldwide process control market. Fisher Controls' products include a wide range of control valves and regulators and a line of electronic and pneumatic field instrumentation, control room instrumentation, and digital control systems. These products are applied throughout a broad spectrum of energy and processing industries, including chemical, petrochemical, pulp and paper, power, metal processing, oil and gas production, and refining.

MONSANTO RESEARCH CORPORATION

Monsanto Research Corporation is a wholly owned subsidiary engaged principally in government contract work. It operates Mound Facility, in Miamisburg, Ohio, for the United States Department of Energy. Its Dayton Laboratory at Dayton, Ohio provides environmental research and services, and custom synthesis and interim chemical manufacture for government agencies and commercial organizations. It also manufactures radioactive sources for worldwide sale.

0684220

TOWOLDMON0042304
WATER_PCB-00033350

The products manufactured and sold by Monsanto's operating companies, its International Division and its major subsidiaries are listed on the following pages. In order to help you locate products, the catalog is divided into the following sections.

COMPANY ORGANIZATION (See page 1)

A brief resume of Monsanto's organization, describing the broad areas of company interests and the specific interests of the operating companies, International Division and subsidiaries

ALPHABETIC PRODUCT INDEX (See page 4)

Includes products and their uses, refers to the page where specific product descriptions may be found, and to the Locator Key which tells where you may place an order or obtain additional product information.

PRODUCT USE INDEX (See page 12)

Specific uses to which Monsanto products may be put; for example, as Agricultural and Farm Products or as Paint/Coating Ingredients. This index also refers to the Locator Key and to the page where the product description may be found.

LOCATOR KEY (See page 69)

Shown at the lower right of each product description. It works like this: If you need additional information on acetylsalicylic acid (aspirin), Locator Key 36a refers to the marketing offices that handle this product. Thus, if you are located in Milwaukee, Wisconsin, our Chicago office would be most convenient for you.

MAJOR OFFICES (See page 72)

Major offices of the company, both in the United States and abroad. This includes the location, address and telephone number of corporate organizations, operating companies, the International Division and subsidiaries. Marketing offices outside the United States, multicompany marketing offices, and those maintained by operating companies are also listed.

TRADEMARKS (See page 19)

The word *Monsanto* and the *Monsanto Block M* are Monsanto's most important trademarks. They are registered in the U.S. Patent Office and in most countries throughout the world. Indices used in this catalog also contain other trademarks owned by Monsanto and its subsidiaries. Trademarks which are registered in the U.S. Patent Office are followed by the ®. Unregistered trademarks and those for which registration is pending are followed by an asterisk.

ADHESIVES and ADHESIVES COMPONENTS		
Adhesives		
Phenolic and Resorcinol Resins	43b	22
Adhesives Components		
Butvar® Resins	43a	53
Formvar® Resins	43a	53
Gelva® *Multipolymer Resin Solutions*	43a	52
Gelva® Resin Emulsions	43a	52
Gelva® Resin Solution	43a	52
Gelvatol® Resins	43a	52
Lytron® Latices	43a	54
Santicizer® 141 *plasticizer*	34a	49
Santicizer® 160 *plasticizer*	34a	49
Santicizer® 261 *plasticizer*	34a	49
Santicizer® 711 *plasticizer*	34a	50
Scripset® Resins	43a	54
AGRICULTURAL and FARM PRODUCTS		
Feed Additives		
Aflaban® *mold inhibitor*	36a	24
Lactic Acid, U.S.P., Food Grade and Technical Grade	3ba	31
MHA® Methionine Hydroxy Analog *calcium*	3ba	24
Phosphoric Acid 75, 80 and 85%	31a	46
Santoquin® *preservative (technical ethoxyquin)*	3ba	24
Fertilizers		
Ammonia, Anhydrous	11a	22
Ammonium Nitrate 83% Solution	11a	22
Diammonium Phosphate (DAP)	31a	45
E-2® *Ammonium Nitrate Fertilizer Prills*	11a	22
Monoammonium Phosphate (MAP)	31a	45
Monopotassium Phosphate	31a	46
Phosphoric Acid 75, 80 and 85%	31a	46
Herbicides		
Avadex® *diallate*	12a	23
Avadex® BW *triallate*	12a	23
Far-Go® *triallate*	12a	23
Lasso® *alachlor*	12a	23
Machete® *butachlor*	12a	23
Ramrod® *propachlor*	12a	23
Ramrod®/atrazine *propachlor/atrazine*	12a	23
Randox® *CDAA*	12a	23
Roundup® *glyphosate*	12a	23
Vegadex® *CDEC*	12a	23
Insecticides		
Ethyl Parathion	12a	23
Methyl Parathion	12a	24
Plant Growth Regulator		
Polaris®	12b	24
Related Products/Services

ADHESIVES and ADHESIVES COMPONENTS

ADHESIVES

PHENOLIC and RESORCINOL RESINS

Supplied as liquids, various grades of phenolic and resorcinol resins are available for bonding applications demanding an extremely high degree of water resistance. Bonds can withstand continuous boiling. The resins are used as glues for plywood, hardboard, particle board bonding and general woodworking. They can be cured by hot and cold press laminating or radio frequency.

HERBICIDES

AVADEX* *diallate*

A proprietary herbicide supplied in liquid and granular form for controlling infestations of wild oat in sugarbeet, flax and certain other crops. Liquid contains 4 lbs./gallon; granules, 10% active (2,3-dichloroallyl) diisopropylthiocarbamate. Applied as ground or aerial spray.

MONSANTO AGRICULTURAL PRODUCTS CO. Locator Key **12a**

AVADEX* BW and FAR-GO* *triallate*

A proprietary herbicide supplied in liquid and granular form for control of wild oat infestations in barley, spring wheat, Durum wheat and certain other crops. Liquid contains 4 lbs./gallon; granules, 10% active 2,3,3-trichloroallyl diisopropylthiocarbamate.

MONSANTO AGRICULTURAL PRODUCTS CO. Locator Key **12a**

LASSO* *alachlor*

A proprietary herbicide available as a 4 lb. per gallon (active ingredient) emulsifiable concentrate and a 15% (active ingredient) granule. The active ingredient is 2-chloro-2', 6'-diethyl-N-(methoxy methyl) acetanilide. *Lasso* is used for selective weed control in corn, soybeans, peanuts, cotton, potatoes, dry beans, green peas and ornamentals. Available in 5 gallon cans, 55 gallon drums and bulk quantities of greater than 1000 gallons.

MONSANTO AGRICULTURAL PRODUCTS CO. Locator Key **12a**

MACHETE* *butachlor*

A proprietary herbicide supplied in liquid and granular form for control of a wide range of weeds in rice and barley. The formulation varies from country to country. *Machete* is not sold in the United States.

MONSANTO AGRICULTURAL PRODUCTS CO. Locator Key **12a**

RAMROD* *propachlor*

Ramrod herbicide is available as 20% active granule and as 65% active wettable powder. The active ingredient is 2-chloro-N-isopropylacetanilide. *Ramrod* is used for selective weed control in corn, grain sorghum (milo) and seed soybeans. The wettable powder is also cleared for use on processed green peas.

MONSANTO AGRICULTURAL PRODUCTS CO. Locator Key **12a**

RAMROD* */atrazine (propachlor/atrazine)*

A preblended herbicide mixture available as wettable powder. The active ingredients are 2-chloro-N-isopropylacetanilide (48.1%) and 2-chloro-4-ethylamino-6-isopropylamino-s-triazine (20.9%). *Ramrod* /atrazine is used for selective weed control in corn and grain sorghum (milo). Also available as a flowable formulation with a 3:1 ratio of propachlor to atrazine for use on grain sorghum (milo) only.

MONSANTO AGRICULTURAL PRODUCTS CO. Locator Key **12a**

RANDOX* *CDAA*

A proprietary herbicide supplied in liquid and granular form for controlling infestations of many annual grasses in onion and certain other crops. Liquid contains 4 lbs./gallon; granules, 20% active 2-chloro-N,N-diallylacetamide.

MONSANTO AGRICULTURAL PRODUCTS CO. Locator Key **12a**

ROUNDUP* *glyphosate*

A proprietary herbicide, available as a liquid formulation, containing 4 lbs./gallon isopropyl-amine salt of glyphosate. Offers effective postemergent control of many emerged annual and perennial broadleaves and grasses.

MONSANTO AGRICULTURAL PRODUCTS CO. Locator Key **12a**

VEGADEX* *CDEC*

A proprietary herbicide supplied in liquid or granular form to control certain annual grasses and broadleaf weeds in a variety of vegetable crops. Liquid contains 4 lbs./gallon; granules, 20% active 2-chloroallyl diethyldithiocarbamate.

MONSANTO AGRICULTURAL PRODUCTS CO. Locator Key **12a**

INSECTICIDES

ETHYL PARATHION

A technical grade material supplied to formulators who manufacture their own trademarked ethyl parathion products. Ethyl formulations are registered for use in controlling a wide spectrum of insect pests in all the major commercial agricultural crops. Poison emblem and antidote are required on labels. Ethyl parathion is a restricted use herbicide.

MONSANTO AGRICULTURAL PRODUCTS CO. Locator Key **12a**

TOWOLDMON0042325
WATER_PCB-00033371

METHYL PARATHION

A technical grade material supplied to formulators who manufacture their own trademarked methyl parathion products. Methyl is typically combined in formulations with other insecticidal materials such as EPN and toxaphene. Methyl parathion formulations are widely used for broad-spectrum insect control in cotton, soybeans and many other fruit crops. Poison emblem and antidote are required on labels. Methyl parathion is a restricted use herbicide.

MONSANTO AGRICULTURAL PRODUCTS CO. Locator Key **12a**

PLANT GROWTH REGULATOR

POLARIS®

A proprietary plant growth regulator for ripening sugarcane. It has been effective in hastening maturity early in the harvest season when sucrose levels are low and natural ripening conditions are adverse. A water soluble product, containing 85% active ingredient.

MONSANTO® HX-30 (REGULAR) AMMONIUM NITRATE FERTILIZER *industrial grade*

HX-30 ammonium nitrate fertilizer is a spherical, white prill containing 1.0% to 1.5% kaolin coating, 0.3% moisture and 0.07% organic matter. Its bulk density is 48 lbs./cu. ft. and the prills are treated to resist caking. HX-30 prills exhibit a *controlled internal porosity for maximum* oil absorbency which, upon mixture with fuel oil or other carbonaceous fuels to make ANFO, produces a blasting agent well suited for use in open pit mining, quarrying and construction.

MONSANTO AGRICULTURAL PRODUCTS CO. Locator Key **11b**

M•PAK® 100 BLASTING AGENT

M•Pak blasting agents are medium energy explosives designed to meet specific blasting needs in conditions requiring limited water resistance. Available in durable poly textile packages for use in surface coal and metal mining.

MONSANTO AGRICULTURAL PRODUCTS CO. Locator Key **11b**

M•PEL® 000, 600, 650 BLASTING AGENTS

M•Pel blasting agents are free flowing ammonium nitrate based explosives providing the mining industry with reliable, low cost blasting agents where blasthole conditions are dry. They are available in a variety of densities and energies to meet specific blasting requirements.

MONSANTO AGRICULTURAL PRODUCTS CO. Locator Key **11b**

M•POWR® 1100, 1500, 1600, 1650 BLASTING AGENTS

M•Powr blasting agents are packaged explosives in rugged waterproof containers in a variety of densities and energies. The unique, waterproof package feature of *M•Powr* products combined with a wide choice of energies is the proven solution to wet, severe blasting conditions.

MONSANTO AGRICULTURAL PRODUCTS CO. Locator Key **11b**

M•PULZ® 1240, 1260, 1666 BLASTING AGENTS

M•Pulz blasting agents are specific high energy formulations designed for ANFO boostering and as column loads for severe blasting conditions. *M•Pulz* cartridges perform well as column loads in specialized situations such as hole instability, severe toe conditions and thin seams where vibrations limitations demand close control of amount of powder per charge.

MONSANTO AGRICULTURAL PRODUCTS CO. Locator Key **11b**

NITRO CARBO NITRATE (NCN)

Bulk and packaged ammonium nitrate based blasting agents for use in mining, quarrying and construction. Products are sold under the trademarks *M•Pel, M•Pak, M•Powr,* and *M•Pulz.*

ENVIRONMENTAL CONTROL

AMMSOX® SYSTEM

System to remove sulfur oxides from gas streams; applicable to SO_2 emitting sources.

MONSANTO ENVIRO-CHEM SYSTEMS INC. Locator Key **33a**

ENVIRONMENTAL SERVICES

Stack, ambient, or occupational exposure testing for air pollutant levels; water and wastewater sampling; complete supporting services which include instrumental and wet method analysis, data evaluation and report preparation.

MONSANTO RESEARCH CORPORATION Locator Key **71a**

Enviro-Chem® equipment, developed by Monsanto Enviro-Chem Systems, Inc., is supplied to the chemical processing and other industries through an engineering sales service that custom-designs, engineers and constructs a variety of units for special tasks as follows:

MONSANTO® ASPHALT VENT PACKAGE

Collects condensed hydrocarbon vapors from vent streams from various asphalt handling and storage systems with efficiencies of 99.5% and higher. Package is pre-engineered and contains a mist elimination section and air motive section. Capacities range from 100 ACFM up to 1500 ACFM.

MONSANTO ENVIRO-CHEM SYSTEMS INC. Locator Key **33a**

MONSANTO® MIST ELIMINATOR/FILTER

Custom-engineered fiber beds in several types of required support materials and configurations for removing very fine liquid mists and soluble solids from gas streams at efficiencies up to 99.9+% depending on design at low initial pressure drop. Recommended for removal and/or collection of liquid mists or soluble solids that may be valuable, toxic, or contaminating.

MONSANTO ENVIRO-CHEM SYSTEMS INC. Locator Key **33a**

MONSANTO® OLEUM VENT PACKAGE

Converts sulfur trioxide vapor into sulfuric acid mists which are removed in a high efficiency *Monsanto* mist eliminator. Package is pre-engineered, contains an optional hydrolysis system, mist elimination section and air motive section. Capacities range from 100 up to 1500 ACFM.

MONSANTO ENVIRO-CHEM SYSTEMS INC. Locator Key **33a**

MONSANTO® ORGANIC PACKAGE

Collects organic emissions from plastics, textile, and other process exhaust stacks. Package is pre-engineered and contains heat exchange section, mist elimination section, and air motive section. Capacities range from 6,000 to 27,000 ACFM.

MONSANTO ENVIRO-CHEM SYSTEMS INC. Locator Key **33a**

EXTRUDED PRODUCTS

EMBOSSED POLYETHYLENE FILM *diaper film*

White, low density polyethylene film designed for economical and efficient convertibility for use as disposable diaper backing.

MONSANTO PLASTICS & RESINS CO. Locator Key **41c**

FOME-COR® BOARDS

Manufactured Housing *Fome-Cor* Sheathing Board: A light-weight, rigid board made of extruded polystyrene foam securely bonded between two layers of tough kraft linerboard. *Fome-Cor* sheathing board reduces heat, sound, water and air infiltration. It is supplied in ¼" thickness in widths of 6', 7', 7½' and 8', accordian folded in a length of 420'.

Home Improvement *Fome-Cor* Board: Similar construction as above; is used as an underlayment board prior to the residing of an existing residential dwelling. It is supplied in ¼" thickness in a width of 4', accordian folded in a length of 50'.

Automotive *Fome-Cor* Board: A similar sandwich construction as described above, supplied in required densities and sizes for insulation, sound-deadening, and water barrier when used primarily as a substrate for headliners, but also suitable for door panels, quarter panels and package trays.

Graphic Arts *Fome-Cor* Board: Supplied with clay coated bleached and natural brown kraft facings in thicknesses of 1/8" to 3 16" for die-cutting, embossing, silk screening or printing. May be scored and folded for exhibits and point-of-purchase displays.

MONSANTO PLASTICS & RESINS CO. Locator Key **42b**

MONSANTO® POLYETHYLENE SHEETING

Supplied as moisture vapor barrier material in gauges .001" to .010", 1' to 40' width, in 60' to 100' length rolls in natural or black. Used under concrete slabs, over studding, concealed flashing for weather-protecting materials, closing in unfinished construction, lining crawl spaces, and covering fresh concrete.

MONSANTO PLASTICS & RESINS CO. Locator Key **41c**

0684246

TOWOLDMON0042330

POLYETHYLENE PROTECTIVE SHEETING and TAPE

Supplied in gauges ranging from .001" to .010", 3' to 40' widths, 100' to 4000' rolls of natural or black polyethylene. Tape is supplied in 2" x 100' rolls. Used for strip mulching, greenhouse covers, irrigation covers, row covers, pond liners, and protective tarpaulins.

MONSANTO PLASTICS & RESINS CO. Locator Key **41c**

FABRICS, MAN-MADE

BIDIM® *polyester nonwoven fabrics*

Bidim engineering fabrics are made of continuous filament polyester fibers needled to form a highly-permeable fabric. This mechanical interlocking of the polyester fibers makes a geotechnic fabric with the durability and toughness required for a wide variety of end uses. Applications are primarily in civil engineering, with special emphasis on bed stabilization for railroads built over poor loadbearing soils, stabilization and crack-reflection reduction of asphalt roads, particularly under severe freeze-thaw conditions, and bed stabilization for access roads built over poor loadbearing soils. They are also used for constructing low maintenance drainage systems, for establishing erosion control along waterways and shorelines, for earth reinforcement, and in the construction of silt fences.

MONSANTO TEXTILES COMPANY Locator Key **51b**

CEREX® *spunbonded nylon fabrics*

Cerex spunbonded nylon is an extraordinarily tough and durable nonwoven fabric. In the spunbonded process, nylon fibers are self-bonded (no adhesive used) to give a stable fabric that is 100% nylon 6/6, and therefore, mildew and rot resistant. The fiber bonding is permanent. The dimensional stability, tensile strength, stitch strength and tear resistance are extremely high. The fabric has the high-heat resistance of the nylon polymer. *Cerex* nylon can be used in interlining applications, as a quilting medium, as a reinforcing agent, a substrate for coating thermoplastic resins, a strength-giving web for tissue laminates, and a filtration media. It can be readily bonded to itself or to other materials with standard adhesives, dyed to any shade with nylon dyes or printed with multi-color designs.

MONSANTO TEXTILES COMPANY Locator Key **51b**

FIBERS, MAN-MADE

ACRILAN® *acrylic fibers*

Available in 1.2-15 denier in a variety of staple lengths and tow suitable for a full range of woven, knit, and tufted textile and industrial applications. The standard product has excellent whiteness and high resilience, and is available in types designed for the cotton, woolen, and modified-worsted spinning systems. Types especially tailored to excel in certain end uses include: bicomponent fibers (for sweaters and carpets), producer-colored fibers (for deep-pile apparel and carpets).

MONSANTO TEXTILES COMPANY Locator Key **51a**

BI-LOFT® *acrylic fibers*

Acrilan yarn with a content of 35% or more high bulk component. Developed specifically for use in sweaters and half hose where bulk is a desirable property. Comes in a range of deniers from 2 to 5 to achieve products offering unique hand and exceptional consumer appeal.

MONSANTO TEXTILES COMPANY Locator Key **51a**

FILAMENT NYLON YARNS

Available in 3-18 denier per filament products in a full range of weaving, knitting, and tufting multifilament yarns for apparel, carpet, home furnishings, industrial, military, and tire applications, as well as monofils for hosiery. Types specially engineered for high performance in certain end uses include: *Actionwear®* stretch nylon hosiery yarns, and *Ultron®* static-resist, low soiling, advanced-generation carpet yarns in bright and wool-like classic lusters, and *Blue "C"®* nylon for home furnishings and other textile uses. High tenacity nylon filament yarns are available in yarn deniers from 30 to 1890 for use in applications requiring high strength and durability such as tire reinforcement, conveyer belt fabrics, high pressure hose, broad and narrow woven industrial fabrics, rope and cordage, and industrial sewing threads.

MONSANTO TEXTILES COMPANY Locator Key **51a**

NYLON STAPLE

Available in 6, 10, 15 and 18 denier per filament products as regular and advanced generation [illegible] static-resist and low-soiling carpet yarns in bright and wool-like classic luster.

MONSANTO TEXTILES COMPANY Locator Key **51a**

TOWOLDMON0042331
WATER_PCB-00033377

POLYESTER FILAMENT YARNS

Available in popular multifilament textile deniers as partially drawn yarns specially tailored for draw texturing and as producer-textured yarns. The textured product is used in warp-knit, circular-knit, or broadwoven equipment, principally for apparel outerwear.

MONSANTO TEXTILES COMPANY — Locator Key **51a**

POLYESTER STAPLE FIBERS

Available in 1.5-6 denier fiber in staple lengths suitable for a wide variety of apparel, home furnishings, and industrial applications. The standard *Blue "C"* polyester staple fiber has excellent whiteness and is crimped for high resilience in woven, knit, and fiber filled products. *Spectran*® polyester staple is engineered to provide the excellent performance properties of regular polyester with superior dyeing properties and exceptional hand, drape, stain and soil release performance.

MONSANTO TEXTILES COMPANY — Locator Key **51a**

SEF® *modacrylic fibers*

Available in 3, 5, or 8 denier fiber in popular staple lengths for use in children's sleepwear, draperies, and area rugs. In proper constructions, such items will meet federal and other applicable flammability standards. Also available in 3 denier, uncrimped tow for use in battery separators. This fiber combines the excellent aesthetic and processing characteristics of acrylics with the flame-retardant qualities of conventional modacrylics to yield an acrylic-like modacrylic of broad utility in apparel and home furnishings applications.

MONSANTO TEXTILES COMPANY — Locator Key **51a**

WEAR-DATED® *textile products*

The Monsanto licensing program for consumer products made from its *Acrilan* acrylic, nylon, polyester and modacrylic yarns and fibers was launched in 1962. Manufacturers of apparel and home furnishings whose merchandise meets Monsanto quality standards are licensed to use the *Wear-Dated* tag. This is the consumer's warranty that if the item does not give normal wear for the specified period of time (one year for apparel and certain home furnishings fabrics, and two to five years for other home furnishings fabrics, depending on the product and its intended use) Monsanto will refund the purchase price or replace the item when returned with the *Wear-Dated* tag and sales slip. In the case of *Wear-Dated* upholstered fabrics, only the sales slip and the filled-out *Wear-Dated* tag is returned and the upholstery fabric is repaired or replaced after home inspection verified failure to give normal wear within two years from date of purchase.

Textile products submitted for licensing under the *Wear-Dated* program are tested for fiber content, colorfastness, construction and various other criteria before the license and tags are issued. Merchandise carrying the *Wear-Dated* warranty can, therefore, be depended upon to offer good value and dependable performance. In the United States more than 300 categories of textile products carry the *Wear-Dated* warranty. Increasingly international in scope, the program now operates in about 20 countries.

MONSANTO TEXTILES COMPANY — Locator Key **51a**

FIRE SAFETY, PRODUCTS TO IMPROVE

NOTE: Materials designated in this Product Catalog as "fire resistant" or "flame retardant" generally are more difficult to ignite, or once ignited burn at a slower rate than corresponding conventional materials. These terms do not mean that fire resistant or flame retardant materials will not burn. However, when properly used, Monsanto's fire resistant or flame retardant products are useful in helping customers meet their fire safety requirements.

DIAMMONIUM PHOSPHATE (DAP)
See Page 45

MONOAMMONIUM PHOSPHATE (MAP)
See Page 45

PHOS-CHEK® *fire retardant*

A group of ammonium phosphate formulations containing corrosion inhibitors, thickeners and flow conditioners for use by fire services in retarding forest, brush and wildfires, from aircraft and ground tankers.

MONSANTO INDUSTRIAL CHEMICALS CO. — Locator Key **36b**

PHOS-CHEK® **P/30** *fire retardant*

Phos-Chek P/30 is a catalyst used in intumescent coatings including mastics and latex and alkyd paints. Other applications include use to help meet flammability requirements for rigid and flexible polyurethane foams.

MONSANTO INDUSTRIAL CHEMICALS CO. — Locator Key **36a**

PHOSGARD® **C-22-R** *organophosphorus compound*

Phosgard C-22-R is an effective fire retardant additive. It is useful in urethane foams, phenolics, polymethylmethacrylates, polyester resins and epoxies to help meet some flammability regulations.

MONSANTO INDUSTRIAL CHEMICALS CO. — Locator Key **34a**

0684248

TOWOLDMON0042332
WATER_PCB-00033378

PHOSGARD® 2XC-20 *organophosphorus compound*

Like *Phosgard* C-22-R, this product is an effective flame retardant additive. It is useful in urethane foams, phenolics, acrylics and epoxies and helps meet flammability requirements. It finds particular utility in the flexible urethane foam area where there is a greater need for thermal stability and hydrolytic stability.

FOOD INGREDIENTS

ACIDULANTS

ADIPIC ACID, FOOD (F.C.C.) GRADE

Adipic acid is a white crystalline powder which has been declared GRAS (generally recognized as safe) for use in foods by the F.D.A. It can be used in any nonstandardized food as an acidulant replacing citric and tartaric acid or potassium bitartrate.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

CWS® FUMARIC ACID, FOOD (F.C.C.) GRADE

CWS fumaric acid is a rapidly soluble form of the regular grade of fumaric acid widely used in dry beverage bases, fruit juice drinks, applications where a rapidly soluble acid is a must.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

FUMARIC ACID, FOOD (F.C.C.) GRADE

A white odorless crystalline organic food acid which occurs widely in nature. It is used in such products as pie fillings, fruit juice drinks, gelatin desserts, wine, refrigerated biscuit doughs, jelling aids, and sour rye bread.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

H.T.® MONOCALCIUM PHOSPHATE *monohydrate*
See Page 33

LACTIC ACID, U.S.P., FOOD GRADE and TECHNICAL GRADE

Supplied as food grade and technical grade, lactic acid is a colorless, odorless liquid supplied in 50% and 88% minimum assay concentrations. Food grade lactic acid is used as a food acidulant in green olives, process cheese, jams, jellies, frozen desserts, and as an ingredient in food emulsifiers.

0684249

TOWOLDMON0042333
WATER_PCB-00033379

Technical grade material is used to adjust pH in leather tanning and textile finishing processes and as an intermediate for making the acid's esters and salts.

FLAVORINGS

ETHAVAN® *ethyl vanillin*

Ethavan is a rich vanilla-like flavor. It has approximately three times the flavoring power of vanillin. It is commonly used by flavor manufacturers to replace part of the vanillin to give bouquet to the finished flavor. Because of its higher volatilizing point it is ideally suited for baked goods.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator key **36a**

METHYL SALICYLATE, U.S.P.

Synthetic oil of wintergreen. A man-made product of uniform purity, free of the often erratic fluctuations in odor and flavor of the natural product. It is used in food and beverages as a flavoring. In pharmaceuticals as a medicant, and masking agent for disagreeable tasting drugs. Additional uses include, as a flavor in mouth washes, cough syrups, and dentifrices.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator key **36a**

TOWOLDMON0042334
WATER_PCB-00033380

VANILLIN MONSANTO*

Vanillin is a white crystalline powder used as a synthetic vanilla flavoring in flavor extracts, baked goods, confections, soft drinks and ice cream.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

LEAVENING AGENTS

H.T.* MONOCALCIUM PHOSPHATE *monohydrate*

H.T. is a leavening agent for cookies and used also as the fast reacting component of double acting leavening systems in baking powders and prepared mixes. It is useful in acidic products requiring calcium enrichment and as an ingredient in yeast food and dough improvers.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

LEVN-LITE* *sodium aluminum phosphate*

A special leavening agent used in cake, pancake and biscuit mixes. *Levn-Lite* promotes the formation of unusually white and resilient crumb in white cakes.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

PAN-O-LITE* *sodium aluminum phosphate*

Pan-O-Lite is a two-stage leavening agent specially formulated for cake mixes, pancake and waffle mixes. It imparts lightness and resiliency to baked products by means of a delayed leavening action which promotes stability and extends the shelf life of cake batters.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

PY-RAN* *anhydrous monocalcium phosphate*

Py-Ran is a stabilized anhydrous monocalcium phosphate used as an acid component in leavening agents for self-rising flours, corn meal, cake mixes and baking powders.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

SODIUM ACID PYROPHOSPHATE (SAPP)

A food grade phosphate used as a leavening agent in prepared cake and doughnut mixes, refrigerated doughs, as an antidarkening agent for potatoes. SAPP prevents struvite crystals in canned tuna and crab meat.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

STABIL-9* *sodium aluminum phosphate*

Supplied as an all-purpose, high stability leavening agent for self-rising flour, corn meal and prepared mixes.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

PRESERVATIVES

BENZOIC ACID, U.S.P., F.C.C.

Benzoic acid is supplied in powder or fine crystal form for use as a preservative in acid foods, fruit juices, syrups, margarine, and medicinal preparations.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

MONOSODIUM PHOSPHATE (MSP)
See Page 47

PHOSPHORIC ACID *75, 80 and 85%*
See Page 46

SORBIC ACID and POTASSIUM SORBATE, F.C.C.

Sorbic acid is a naturally-occurring compound, originally obtained from the oil of the rowanberry. Sorbic acid, or its water-soluble potassium salt, is a broad spectrum preservative for human and animal food, and to a lesser extent, for drugs and cosmetics.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

TETRASODIUM PYROPHOSPHATE
See Page 47

FRAGRANCES

AMYL SALICYLATE

Amyl salicylate (a balanced mixture of isomeric amyl esters) is supplied for use in floral perfumes.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

BENZYL ACETATE

Benzyl acetate is a natural constituent of jasmine and is used in soap perfumes.

MONSANTO INDUSTRIAL CHEMICALS CO Locator Key **36a**

TOWOLDMON0042335

FUNCTIONAL FLUIDS

AIRBORNE and SPECIALTY

SKYDROL® *fire resistant hydraulic fluids*

Skydrol fluids are engineered from a series of fire resistant, highly stable phosphate ester base stocks specially-processed under rigorous quality control standards. The operating temperatures, viscosity characteristics, pumpability of each are designed for varying types of service. These include: *Skydrol* "500B", "500B-4", "LD" and "LD-4" grades for jet aircraft. *Skydrol* fluids require compatible construction materials in seals, packings, paints, and wiring. Monsanto's technical service support assists customers in designing these items. *Skydrol* fluids are distributed worldwide to commercial airlines.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

DIELECTRIC HEAT TRANSFER FLUIDS

COOLANOL® 20, 25, 35, 45 *dielectric coolants and heat transfer media*

A series of formulated silicate ester fluids used for a wide range of heat transfer, dielectric and hydraulic fluid applications. The four *Coolanol* fluids span an operating-temperature range of -90°F to 700°F and are used primarily in aerospace and advanced electronic hardware as a coolant/dielectric.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

OS-59* *dielectric heat transfer fluid*

OS-59 is a silicate ester fluid used in electronic equipment as a coolant/dielectric.

WATER_PCB-00033382

PYDRAUL® 10E, 29E LT, 50E, 65E, 90E, 115E *...draulic fluids*

Pydraul E-series (straight phosphate ester) fluids offer a combination of fire resistance and lubrication in industrial hydraulic and air compressor applications. These fluids allow users to select from a wide viscosity range for diecast machines, continuous casters, rolling mill systems, offshore drilling operations, etc.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

SANTOTRAC® LUBRICANTS *synthetic hydrocarbons*
See Page 38

PROCESS

BIPHENYL *also known as diphenyl and phenylbenzene*

Biphenyl is widely used as a raw material for dye carriers in the textile industry, as a deodorant and mildew preventative, and as a chemical intermediate.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

DIPHENYL OXIDE

Diphenyl oxide is intended for use as a chemical intermediate or functional product. Typical uses as an intermediate include the manufacture of brominated fire retardants, alkylated surfactants, and hydrazide foam blowing agents. Other uses include dye carrier, fragrance, and as a process aid.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

SANTOSOL® 200, 300, 340 *dye solvents*

Santosol 200, 300, and 340 are used as the microencapsulation dye solvent portion of the specialized coating used in the manufacture of carbonless copy paper.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

THERMINOL® 44, 55, 60, 66, 88 *heat transfer fluids*

Therminol fluids in this series are liquid phase, low pressure heat transfer media with an operating temperature range spanning -60° to 750°F. Diverse applications for *Therminol* 44, *Therminol* 55, *Therminol* 60, *Therminol* 66, and *Therminol* 88 include indirect heating and cooling in chemical processing, tanker and barge construction, offshore oil and gas platforms, petroleum refining, synthetic fiber manufacturing and finishing, etc.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

THERMINOL® VP-1 *heat transfer fluid*

Therminol VP-1 is a high temperature heat transfer medium used in vapor phase or liquid phase systems in the range of 60° to 750°F.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

VACUUM PUMP FLUID

SANTOVAC® 5 *vacuum diffusion pump fluid, polyphenyl ether*

Santovac 5 is a specially refined vacuum diffusion pump fluid supplied to pump manufacturers and laboratory and industrial users.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

FURNACE LINER EROSION MONITOR

NUCLEAR INSTRUMENTATION

A nuclear instrument system incorporating electronics and radioactive sources monitors liner erosion in commercial phosphorus furnaces. The system is adaptable to other furnaces. Complete design, engineering, and licensing assistance is provided with the system.

MONSANTO RESEARCH CORPORATION Locator Key **71a**

HEAVY CHEMICALS

CAUSTIC POTASH

Used in formulating liquid soaps and detergents, in the manufacture of many organic and inorganic potassium salts, petroleum refining and in the fertilizer industry.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

CHLOROSULFONIC ACID

Colorless, corrosive liquid used as a sulfonating agent in the production of synthetic detergents, pharmaceuticals, dyes, ion exchange resins and a variety of specialty chemicals.

PHARMACEUTICALS

ACETAMINOPHEN (APAP)

Acetaminophen (APAP) is a nonaspirin analgesic. It has the benefits of being an effective antipyretic and pain reliever. It is used singularly and in combination with other pharmaceutical and proprietary formulations in tablet, powder, capsule and other special forms.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

ACETYLSALICYLIC ACID *aspirin*

Aspirin is the largest selling analgesic in the world with added benefits of being an effective antipyretic and anti-inflammatory. It is used singly and in combination with other ingredients in pharmaceutical and proprietary formulations in tablet, powder, capsule and other special forms.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

BENZYL BENZOATE, U.S.P.

Benzyl benzoate U.S.P. is used primarily as a fixative and as a diluent in perfume formulations. It is also used in the treatment of scabies. Additionally, benzyl benzoate is used in textile dye intermediate formulations.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

L-DOPA *L-dihydroxyphenylaline*

L-Dopa is a white powder, effective in the treatment of the symptoms of Parkinson's disease.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

METHOTREXATE, U.S.P.

This potent folic acid antagonist is supplied as high purity yellow crystals, suitable for parenteral applications. It is used in treatment of neoplasms and psoriasis, and as an immunosuppressant and antimetabolite.

MONSANTO RESEARCH CORPORATION Locator Key **71a**

3,4,5-TRIMETHOXYBENZALDEHYDE (TMB)

A white powder, TMB is a raw material in the production of an antibacterial drug.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

VANILLIN TECHNICAL

Vanillin technical is a white crystalline powder used as a pharmaceutical intermediate and in some metal plating applications.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

PHENOLS

para-CHLOROPHENOL

Organic intermediate used in the manufacture of dyestuffs, primarily hydroquinone and anthraquinone vat dyes. Other potential applications are for the manufacture of specific germicides, coccidiostats and miticides.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

para-CUMYL PHENOL

Organic intermediate for the production of phosphate esters and as a dye carrier.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

2,4-DICHLOROPHENOL

Organic intermediate used in the manufacture of agricultural chemicals, bacteriostats, fungistats, germicides, and dyestuffs.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

DIDODECYL PHENOL *crude*

A coproduct of the manufacture of dodecylphenol, didodecyl phenol shows promise as a specialty surfactant in oil treating.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

DINONYL PHENOL *crude*

A coproduct of the manufacture of nonylphenol, dinonyl phenol is commonly ethoxylated for use as a specialty chemical in oil treating and agricultural emulsifiers.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

DODECYLPHENOL *alkyl phenol*

Reactive dodecylphenol is specifically designed for use in the manufacture of chemical intermediates. Typical reactions with dodecylphenol are ethoxylation, condensations with aldehydes, etherification, esterification, halogenation, mercuration, nitration, polymerization, and sulfonation.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

para-NITROPHENOL

Supplied in tan to greenish brown flake or granular form, assay 99.0% minimum, molecular weight 139.11. The compound is highly toxic. It is used by chemical manufacturers as an intermediate for making dyestuffs, insecticides, photographic chemicals, leather tanning compounds and pharmaceuticals.

MONSANTO AGRICULTURAL PRODUCTS CO. Locator Key **13a**

OTHER ORGANIC CHEMICALS

CYANURIC ACID

Cyanuric acid stabilizes chlorine against loss from ultraviolet light degradation. Its primary use is in swimming pools.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

CYCLOHEXANOL

An intermediate used in making plasticizers; dry cleaning, dyebath and textile finishing formulations; and for the manufacture of cyclohexanone and adipic acid.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

ETHYL ACETATE

Monsanto® ethyl acetate is available at ester assays of 99.5%, 95-98%, and 85-88%. All grades are clear, sediment-free and the color does not exceed 5 (APHA). The water content is 0.05% max. and the characteristic odor is nonresidual. The products are suitable for coating resin-solvents, cellophane lacquers, and miscellaneous solvent uses in the paint and plastic industries.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

PROPIONITRILE

Converted into propionic acid and di-*n*-propylamine. Also finds application as an organic solvent.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

PAINT/COATING INGREDIENTS

BUTVAR® RESINS
See Page 53

FILTROS® *gum rosin*

Naturally-occurring gum rosin produced by distillation of pine tree pitch for use in paints, varnishes and lacquers.

MERSIZE® *paper sizing agent*

Mersize TFL, Mersize ExCL and Mersize RM Dry are forms of chemically fortified rosin-based sizes that are ready to use in a paper mill to reduce sizing costs, improve resistance to ink, water and other aqueous solutions, give better feathering resistance and more uniform dependable sizing.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

MONSIZE® *paper sizing agent*

A highly efficient wet-end sizing agent supplied as a liquid. It is approximately twice as efficient as paste rosin size which allows maximum sizing with minimum sizing solids in the sheet. *Monsize* sizing agent functions well over a pH range of 4.0 to 6.8.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

RPC-1600 *cationic resin*

A water solution of a highly cationic nonthermosetting resin, used as a retention aid.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

SANTO-RES® 21, 30 & 31 SERIES *paper chemicals*

Santo-Res 21 is a cationic retention aid, useful for retaining dispersed rosin sizes, improving drainage and retaining fines. It is also used to impart a high degree of strength to unbleached paper and board when wet, and to extend life of paper products exposed to weather.

Santo-Res 30 & 31 are caustic activatable polymer solutions designed to impart high levels of wet strength to paper products made from bleached or reclaimed pulp. They also are effective as a Yankee drier coating aid.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

SCRIPSET® 500, 700 SERIES *paper coating and specialty coating resins*

Scripset resins are supplied in a variety of grades convenient for the papermaker's process and handling. The *Scripset* 500 resins are film-formers for surface treating paper and paperboard to improve printability, create good surface qualities and impart water resistance. The *Scripset* 700 series resins are new improved liquid variations of the dry 500 series resins.

PETROCHEMICALS

MONOMERS

ACETIC ACID *glacial and commercial*

Supplied in commercial grades and as glacial acetic, assay minimum 99.8% acetic acid. Shipped with color less than 15 Pt-Co units. Used as a chemical intermediate, in the manufacture of cellulose and vinyl acetate resins and in the textile industry.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

ACRYLONITRILE

A monomer used in the manufacture of acrylic textile fibers, ABS plastics, nitrile rubber, copolymer latices, and as a chemical intermediate.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

BUTADIENE

Supplied, inhibited with tertiary butylcatechol, in liquified gas form with 99.3% minimum assay. A highly reactive hydrocarbon, it is used in the manufacture of styrene, acrylonitrile, and polybutadiene synthetic rubbers and various types of latices used in paints and binders for nonwoven fabrics. It is an intermediate for manufacturing adiponitrile, tetrahydrophthalic anhydride and ABS plastics.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

FORMALDEHYDE

Supplied in grades with a choice of assay: 37%, 44%, 50%, and 52% (methanol-free) and 37% and 44% inhibited with 7% and 15% methanol. Used as a preservative, disinfectant and an intermediate in the manufacture of melamine and phenolic resins.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

PHENOL

A major basic chemical intermediate, phenol is used in the manufacture of phenolic resins for molding and laminating; for lacquers and varnishes; in the manufacture of germicides, antiseptics, preservatives, insecticides, photographic chemicals, dyestuffs; and as a selective solvent in petroleum refining. Supplied in crystalline form.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

0684261

TOWOLDMON0042345
WATER_PCB-00033391

STYRENE MONOMER

An aromatic hydrocarbon with an aliphatic side chain supplied as a colorless liquid inhibited with TBC. Styrene monomer is used to make polystyrene plastics, copolymer resins, SBR synthetic rubber and latices, ion exchange resins, polyesters, and styrene-modified oils and alkyds for surface coatings.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

OTHER PETROCHEMICALS

ACETONE

Supplied as a liquid, APHA color 5 maximum and 0.5% moisture maximum. It is used widely as a commercial solvent and as an intermediate in chemical manufacturing.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

ACETOPHENONE

A commercial grade organic intermediate chemical supplied as a liquid assaying typically 40-60% by weight.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

AROMATIC CONCENTRATE C_9 *mixed isomers*

Supplied as a liquid concentrate containing mixed isomers of trimethylbenzene. It is used for gasoline blending and by chemical manufacturers for making intermediates and as a specialty solvent.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

BUTENE-2 CONCENTRATE

Supplied in liquid form (under pressure), the concentrate is a colorless olefinic hydrocarbon, predominantly *cis*- and *trans*- butene used by chemical manufacturers as a butadiene feed stock, a cross-linking agent in the manufacture of intermediates and as a specialty solvent.

MONSANTO CHEMICAL INTERMEDIATES CO Locator Key **21a**

BUTYLENES *mixed isomers*

Supplied as mixed isomers in liquid form under pressure, the principal constituents are *iso*-butylene and *n*-butene-1. The material is used by chemical manufacturers for making chemical intermediates, polymers and gasoline components.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

CUMENE CONCENTRATE

A hydrocarbon containing typically 60% cumene, 15% ethylbenzene and 10% acetone. It is supplied to blenders as an aromatic gasoline blend stock.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

DICYCLOPENTADIENE CONCENTRATE

A liquid concentrate containing a minimum of 70% $C_5H_6C_5H_6$. It is used by chemical manufacturers to make hydrocarbon resins, insecticides, surface coatings and intermediates.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

DIISOPROPYLBENZENE

An industrial grade hydrocarbon that typically assays 60-65% *mixed isomers*. It is used as an aromatic gasoline blend stock.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

ETHYLBENZENE

A liquid organic compound supplied to chemical manufacturers for conversion to styrene monomer. It is also used as a resin solvent.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

ETHYLENE

An industrial gas with a typical analysis of 99.8% minimum C_2H_4 supplied by pipeline to chemical manufacturers and used in making polyethylene plastics, ethyl alcohol, ethylene glycol, styrene and other intermediates.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

ISOPRENE CONCENTRATE

An aliphatic liquid typically containing 50-53% weight isoprene. Supplied to chemical manufacturers and used in making isoprene monomers, for *cis*-polyisoprene rubber and as a resin raw material.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

METHANOL *methyl alcohol*

Commercial methyl alcohol supplied to the chemical processing industries and used as an intermediate, for making formaldehyde, as antifreeze, a solvent, and a denaturant.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

0684262

TOWOLDMON0042346
WATER_PCB-00033392

METHYLACETYLENE/ALLENE CONCENTRATE

An aliphatic concentrate of $CH \equiv C—CH_3$ and $CH_2 = C = CH_2$ supplied to chemical manufacturers in liquid form under pressure as a reactive hydrocarbon for chemical synthesis and as fuel in metal cutting and brazing. It has reaction properties and burning characteristics similar to acetylene.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key: **21a**

alpha-METHYLSTYRENE *crude*

A commercial chemical raw material typically containing 70-75% *alpha*-methylstyrene, 14-17% cumene; used by chemical manufacturers in making plastics, surface coatings and synthetic rubber.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key: **21a**

PHENOLIC TARS

A heavy petroleum residue from phenol manufacture supplied to blenders and used in low sulfur fuel oil.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key: **21a**

PIPERYLENE CONCENTRATE

An aliphatic liquid containing approximately 30% minimum assay of *trans*- and *cis*-piperylenes ($CH_2=CH-CH=CH-CH_3$). The concentrate is supplied to chemical manufacturers for making hydrocarbon resins and intermediates.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key: **21a**

PROPANE

An industrial gas used as a chemical intermediate or fuel.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key: **21a**

PROPYLENE

An olefinic hydrocarbon raw material shipped as a liquid under pressure with 92% minimum of $CH_3CH = CH_2$, the balance principally propane. It is used in the manufacture of intermediates

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key: **21a**

RESIN OIL

A highly unsaturated alkyl-aromatic hydrocarbon mixture in liquid form supplied to chemical manufacturers and used in making high grade hydrocarbon resins.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key: **21a**

RESIN PR

Supplied as a heavy liquid aromatic petroleum residue which is used in the production of petroleum coke, electrode binder, and miscellaneous industrial pitch products.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key: **21a**

XYLENES *para/meta*

Supplied as para-meta xylenes as commercial grade $(CH_3)_2C_6H_4$ to chemical manufacturers for use in the manufacture of intermediates such as terephthalic and isophthalic acids and their esters.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key: **21a**

PHOSPHORUS and PHOSPHORUS DERIVATIVES

AMMONIUM PHOSPHATES

DIAMMONIUM PHOSPHATE (DAP)

Technical grade diammonium phosphate (DAP) is used as a fire retardant for cellulosic materials such as wood, paper, cotton; as a source of nitrogen and phosphorus in soluble specialty fertilizers, and in the production of phosphors.

Food grade is used in making yeast and in dough conditioners or yeast foods to promote yeast leavening. Its nutrient value is also used for antibiotic production, bacterial starters and metabolic processes in general.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key: **31a**

MONOAMMONIUM PHOSPHATE (MAP)

Technical grade monoammonium phosphate (MAP) is a fire retardant useful in paper, wood, textiles and other cellulose based products; is the major ingredient in ABC type fire extinguishers; is used as an acidulant in dye baths and as a source of nitrogen and phosphorus in soluble specialty fertilizer products.

Food grade monoammonium phosphate (MAP) is used in making yeast and in dough conditioners or yeast foods to promote yeast leavening. Its nutrient value is also used for antibiotic production, bacterial starters and metabolic processes in general.

CALCIUM PHOSPHATES

BONE ASH (NATURAL)
See Page 37

CALCIUM PYROPHOSPHATE

Food grade phosphate salt for use as a dentifrice polishing agent; for food enrichment; and as an ingredient in pharmaceutical preparations. It is also used in manufacture of bone white china.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

DICALCIUM PHOSPHATE, ANHYDROUS

A food grade phosphate salt used as a high abrasive polishing agent in toothpastes and powders; as a mineral supplement in prepared foods and cereals, and in pharmaceutical preparations.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

DICALCIUM PHOSPHATE, DIHYDRATE

A food grade phosphate used primarily as a polishing agent in toothpastes and powders; as a mineral supplement; and in pharmaceutical preparations.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

H.T.* MONOCALCIUM PHOSPHATE *monohydrate*
See Page 33

LUSTRE-PHOS* *dentifrice abrasive*

Lustre-Phos is a white tasteless crystalline powder used in dentifrices as a controlled abrasive to impart optimum cleaning and polishing of the teeth.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

MOULD COAT *synthetic bone ash*
See Page 37

PY-RAN* *anhydrous monocalcium phosphate*
See Page 33

TRICALCIUM PHOSPHATE

A food grade phosphate used as a flow conditioner and anticaking agent in granular and powdered products; as a mineral supplement in food and pharmaceutical preparations; and as a suspending agent in the manufacture of polystyrene.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

PHOSPHORIC ACIDS

PHOSPHORIC ACID *75, 80 and 85%*

Technical grade phosphoric acid is used in the manufacture of phosphate salts; for metal cleaning and treating; as a binder in refractory products; as a clarifying agent in sugar processing; in the electropolishing and pickling of steel; as a catalyst in various processes; in industrial and institutional cleaning products; in liquid fertilizer compositions; as a nutrient in industrial waste treatment; as the major component of aluminum bright-dip baths; as a corrosion inhibitor in antifreeze; and in rust-proofing and phosphatizing compositions.

Food grade phosphoric acid is used as an acidulant for soft drinks, particularly colas. It is used in the manufacture of gelatin, cottage cheese, some processed cheeses, fats, shortenings, sugar cane refining, jellies and preserves, soya protein processing, nutrient in yeast production, control of bacterial growth in selected processed foods, and in the manufacture of food grade phosphate salts.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

POTASSIUM PHOSPHATES

MONOPOTASSIUM PHOSPHATE

Technical, food and NF grade phosphate salt used to control pH of culture media in penicillin manufacture; for special medicinal purposes; and soluble fertilizers.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

TETRAPOTASSIUM PYROPHOSPHATE

A technical grade phosphate salt used in detergent formulations; as a processing aid in synthetic (cold) rubber manufacture and as an ingredient for synthetic resin emulsion paints.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

TRIPOTASSIUM PHOSPHATE

A technical grade phosphate salt used as a processing aid in synthetic (cold) rubber manufacture and as a hydrogen sulfide scavenger in petroleum processes.

A food grade is supplied for use as a buffering agent in several food products.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

0684264

TOWOLDMON0042348
WATER_PCB-00033394

SODIUM PHOSPHATES

DISODIUM PHOSPHATE, ANHYDROUS

A technical grade phosphate salt used for boiler water treatment; in making glazes for potteries, porcelains and chinaware; in various chemical processes; in the preparation of enamels; in tinning; in leather tanning; as a bath ingredient in galvanoplastic work; in the manufacture of pigments such as cobalt phosphate; in the weighting of silk and impregnating of textiles in dyeing and calico printing.

A food grade is supplied for use in process cheese, quick cooking cereal products, evaporated milk and pharmaceutical applications.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

DISODIUM PHOSPHATE, DUOHYDRATE

A food grade phosphate used for preventing coagulation during processing of condensed milk and as an emulsifying agent in processing cheese.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

EMULSI-PHOS® *cheese emulsifier*

A food grade phosphate specially designed for use in process cheese, cheese food and cheese spreads.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

INSOLUBLE SODIUM METAPHOSPHATE

An insoluble food grade phosphate salt that is used primarily as a polishing ingredient in toothpaste and powders.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

LEVN-LITE® *sodium aluminum phosphate*

See Page 33

MONOSODIUM PHOSPHATE (MSP)

A technical grade phosphate salt used in metal cleaners, water conditioning, as an electroplating solution buffer, and as a textile dyeing aid.

A food grade is supplied for use as a mineral supplement, a pharmaceutical ingredient, as an acidulant in powdered beverages, processed meat products and frozen egg preservation.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

OILFOS® *glassy sodium phosphate*

Oilfos is a glassy polyphosphate used exclusively for controlling viscosity of oil well drilling muds.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

PAN-O-LITE® *sodium aluminum phosphate*

See Page 33

SODIUM ACID PYROPHOSPHATE (SAPP)

See Page 33

SODIUM HEXAMETAPHOSPHATE

A technical grade phosphate salt used in water softeners, in boiler water treatment, as an ingredient in dishwashing compounds and detergents, and as a deflocculating agent.

The food grade is supplied for use in dietary supplements and in curing meat products.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

SODIUM TRIPOLYPHOSPHATE (STP)

The technical grade of STP is used as a detergent builder; for water softening; in conditioning oil well drilling muds; and as an additive in a variety of products and processes to eliminate scum and soap curds in hard water; to clean metal; deflocculate clays, to improve textile processing.

The food grade STP, sold under the trademark Nutrifos®, is used in curing hams and related meat products.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

SQ PHOSPHATE *sequestrant*

Supplied as a glassy polyphosphate of high sequestering power for use in formulating industrial cleaning compounds, dishwashing formulations, and dairy cleaners.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

STABIL-9® *sodium aluminum phosphate*

See Page 33

TETRASODIUM PYROPHOSPHATE

A technical grade phosphate salt used as a detergent builder; for conditioning oil drilling muds; to formulate household and industrial cleaners and detergents; as a dye bath additive and for metal cleaning; and as a deflocculant in clay processing.

A food grade is supplied for use in meat curing compounds, in instant puddings, as a stabilizer for protein foams, and an antidarkening agent for potatoes.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

TOWOLDMON0042349
WATER_PCB-00033395

TRISODIUM PHOSPHATE, ANHYDROUS (TSP/A)

A technical grade phosphate salt used in heavy duty industrial metal cleaning; water treatment for softening and conditioning; and in abrasive hard surface cleaners.

A food grade is supplied for use as a basic emulsifier in process cheese and as cooking-speed promoter in quick-cook cereals.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

TRISODIUM PHOSPHATE, CRYSTALLINE

A technical grade phosphate salt used principally in heavy duty metal cleaners and in water treatment for softening and conditioning.

A food grade is supplied for use in process cheese, cheese food and cheese spreads as a potent emulsifier.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

OTHER PHOSPHORUS and PHOSPHORUS DERIVATIVES

FERROPHOSPHORUS *iron phosphide*
See Page 37

LoSilPhos* *ferrophosphorus briquettes*
See Page 37

PHOSPHORUS, ELEMENTAL

A pale yellow to deep straw colored waxy solid used as an intermediate in the production of phosphoric acid and organophosphorus compounds, and as an alloying agent in copper alloys.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

PHOSPHORUS OXYCHLORIDE

Used by chemical manufacturers as a chlorinating agent and catalyst in making various intermediates, medicinals, dyestuffs and a reagent for making acetic anhydride and organic phosphates.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

PHOSPHORUS PENTASULFIDE

Supplied as a distillation-purified light greenish-yellow powder in both high and low reactive grades. It is used in the manufacture of lubricating oil additives, thiophosphate insecticidal compounds, salts for ore flotation; as an intermediate for organic synthesis.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

PHOSPHORUS TRICHLORIDE

Supplied as a liquid, it is used by chemical manufacturers variously as a chlorinating agent, catalyst, and reagent in making acid and alkyd chlorides, organic phosphates, germicides, medicinals and in producing iridescent metallic deposits.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

PLASTICIZERS

DI(2-ETHYLHEXYL)ADIPATE (DOA) *dioctyl adipate*

Dioctyl adipate is a high quality plasticizer for imparting low-temperature flexibility to polyvinyl chloride and synthetic rubber compositions.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

DIUNDECYL PHTHALATE (DUP)

DUP is a high molecular weight phthalate plasticizer for PVC resin, offering the best low temperature properties and lowest volatility among the phthalate plasticizers. DUP finds use in PVC wire insulation and PVC automotive interior components because of its excellent performance.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

HB-40® *partially hydrogenated terphenyl*

HB-40 is a plasticizer for vinyl sheeting, films and fabric or paper coatings, and for vinyl protective coatings and adhesives. Used to plasticize vinyl profile extrusions, tubing, wire coating and injection- and slush-molding compounds. Plasticizer for styrene-water dispersion paints, paper coatings, adhesives, styrene casting resins, and polysulfide sealants.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

SANTICIZER® 8 *mixture of N-ethyl-ortho- and para-toluenesulfonamides*

Santicizer 8 is one of the best plasticizers known for synthetic polyamides such as nylon and related resins. It is an excellent plasticizer for cellulose acetate, giving a brilliance and polish not obtainable with other plasticizers. Being practically insoluble in petroleum hydrocarbons, it is a valuable plasticizer for coatings designed to withstand gasoline and related products.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

0684266

TOWOLDMON0042350
WATER_PCB-00033396

SANTICIZER® 9 *mixture of ortho- and para-toluenesulfonamides*

Santicizer 9 differs greatly from other plasticizers in its action. Relatively small amounts impart a gloss to polished articles, give smooth working and uniform curing of molded thermosetting products. Blends readily with most synthetic resins, does not impart the softening action of liquid plasticizers. Particularly valuable to the makers of molding compositions.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

SANTICIZER® 79-TM

Santicizer 79-TM is a trimellitate ester recommended for its permanent qualities in film and sheeting as well as wire and cable.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

SANTICIZER® 97 *ditn-heptyl, n-nonyl)adipate*

Santicizer 97 is an adipate plasticizer designed to give polyvinyl chloride film, sheet, and coatings extreme low temperature flexibility. In all three applications, *Santicizer* 97 imparts good hand and drape. *Santicizer* 97 is FDA regulated for use in food contact applications.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

SANTICIZER® 141 *alkylaryl phosphate*

Excellent for use in polyvinyl chloride films, sheets, extrusions, moldings, organosols and plastisols. Also, *Santicizer* 141 is a fire retardant and may help meet flammability requirements. *Santicizer* 141 is regulated by the Food & Drug Administration (FDA) for use in food packaging films, protective coatings and adhesives.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

SANTICIZER® 143 *modified triaryl phosphate*

Santicizer 143 exhibits the plasticizing efficiency of the alkyl diaryl phosphates while retaining the flame-retardant efficiency of the triaryl phosphates. Santicizer 143 is compatible with polyvinyl chloride, vinyl nitrile elastomers, latex emulsions and cellulosic materials.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

SANTICIZER® 148 *alkyl diaryl phosphate*

Santicizer 148 is a flexibilizing, flame-retarding phosphate particularly useful as a plasticizer for polyvinyl chloride resins for use in wall coverings, film and sheeting and drapery backings which must meet specific fire performance specifications. It imparts excellent low temperature flexibility and provides lower smoke generation characteristics in several formulations. *Santicizer* 148 is also excellent as a plasticizer for rubber, particularly the vinyl nitriles.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

SANTICIZER® 154 *triaryl phosphate*

Santicizer 154 is a flame-retardant triaryl phosphate plasticizer suitable for use in a variety of polymer systems. It is compatible with a number of resins including polyvinyl chloride and vinyl nitrile rubber, vinyl acetate emulsions and cellulosics. *Santicizer* 154 is an ideal replacement for tricresyl phosphate and cresyl diphenyl phosphate.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

SANTICIZER® 160 *butyl benzyl phthalate*

Santicizer 160 is a general purpose plasticizer for polyvinyl chloride and is widely used in the flooring industry for its high degree of plasticizing efficiency, stain resistance and adhesive migration resistance. *Santicizer* 160 is also compatible with a wide range of other resin systems including acrylics, urethanes, polyvinyl acetate, cellulose (ethyl and nitro), etc.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

SANTICIZER® 261

Santicizer 261 is a fast fusing monomeric plasticizer that offers high performance, comparable to low molecular weight polymerics, yet still retains the easy processing features of monomeric plasticizers. It finds application in film and sheeting, coated fabrics, plastisols, organisols, vinyl foams, acrylic coatings and polysulfide systems.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

SANTICIZER® 278

Santicizer 278 is a fast fusing, extremely low volatile monomeric plasticizer that offers a high degree of permanence, comparable to polymerics yet retains the excellent processing characteristics of monomerics in vinyl systems. The extremely low volatility and permanence of *Santicizer* 278 makes it one of the products of choice for polysulfide systems.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

TOWOLDMON0042351
WATER_PCB-00033397

SANTICIZER® 409

Santicizer 409 is a permanent plasticizer used in wire coatings and tapes. It is also widely used in high-quality film and sheeting (adhesive backed), organosol fabric coatings, refrigerator gasketing and in other applications requiring a high degree of permanence and resistance to extraction.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

SANTICIZER® 411

Santicizer 411 is a permanent polymeric plasticizer used in outerwear, baby pants, coated cloth (for automobile and furniture upholstery, etc.), wall covering, wire coatings, modified plastisols and organosols, vinyl-metal laminates, and high density foam vinyl.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

SANTICIZER® 412

Santicizer 412 is a permanent plasticizer used in wire and cable compounds, and vinyl plastisols.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

SANTICIZER® 429

Santicizer 429 is a highly efficient permanent plasticizer which provides a good over-all balance of permanent properties.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

SANTICIZER® 546

Santicizer 546 is a fast fusing primary plasticizer for polyvinyl chloride. *Santicizer* 546 also has the unique ability to provide a dry feel and "slip" to the surface of plastisol prepared plastic films.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

SANTICIZER® 711 *ditheptyl, nonyl, undecyl phthalate*

Santicizer 711 is a general purpose plasticizer for PVC resin which outperforms DOP (dioctyl phthalate) in the critical areas of low temperature flexibility, volatility and plastisol viscosity stability. Often, *Santicizer* 711 is used to replace DOP and adipate plasticizer blends.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

SANTICIZER® 712-TM

Santicizer 712-TM is a trimellitate ester recommended where excellent retention of physical properties is desired for 125°C insulation and automotive applications.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

SANTONOX® and SANTONOX® R *antioxidant*

SANTOWHITE® POWDER *antioxidant*
See Page 25

TRIBUTYL PHOSPHATE (TBP)

Tributyl phosphate is a practically colorless liquid of low viscosity. It is a primary plasticizer and solvent for nitrocellulose, cellulose acetate and chlorinated rubbers. It is recommended as an antifoaming agent and high boiling solvent used in 2,4-D concentrates and uranium recovery.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **34a**

TRIPHENYL PHOSPHATE (TPPA)

Triphenyl phosphate is primarily used as a flame-retardant plasticizer for cellulosics. It also is of interest in heat sealing coatings and adhesives. Triphenyl phosphate is compatible with and acts as a flame retardant for high resilient flexible urethane foams.

RESIMENE® MELAMINE-FORMALDEHYDE
RESIMENE® UREA-FORMALDEHYDE RESINS *coatings*

Supplied in solution form in organic solvents, *Resimene* resins are used to formulate baked on surface coatings. Available as high solids content solutions, *Resimene* resins impart improved surface hardness, weather resistance, and resistance to alkali and chalking. They promote fast cure and excellent color retention. Water soluble grades are also available. The formulated coatings are used on appliances, automotive products, and fabricated industrial parts.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

NYLON RESINS

VYDYNE® *nylon and nylon copolymer resins*

Vydyne nylon and nylon copolymer resins are a family of 66, 66/6 copolymers, 69, and specialty nylon resins designed for a wide variety of molding and extrusion applications. Grades include general purpose, nucleated, heat stabilized, color stabilized, and high viscosity types. They are supplied in natural pellets and salt and pepper pellet blends. Typical applications include fasteners, connectors, insulators, electrical systems and fuel system parts, gears, bearings, films, and filaments in such industries as appliances, automotive and transportation, electrical/electronic, industrial and machinery, packaging, hardware, and textile.

MONSANTO PLASTICS & RESINS CO. Locator Key **42a**

VYDYNE® R *reinforced nylon resins*

A family of mineral-reinforced and glass/mineral-reinforced polyamide engineering thermoplastics designed primarily for molding applications. *Vydyne* R offers high rigidity and tensile strength, resistance to creep under load, and high heat distortion temperature. Processing features include fast cycling (high productivity) and minimum sink mark development. Grades include general engineering and heat stabilized types. They are supplied in natural and black pellets. Used for performance parts including replacement of die cast metals, complex metal assemblies, and more expensive engineering plastics. Suggested applications include appliance, electrical/electronic, industrial, textile, and transportation industry parts.

MONSANTO PLASTICS & RESINS CO. Locator Key **42a**

PHENOLIC RESINS

PHENOLIC and RESORCINOL RESINS
See Page 22

RESINOX® PHENOLIC LIQUID

Resinox liquids are water solutions of phenolic resin. They provide excellent bond strength, heat resistance, chemical resistance and water resistance when cured. They are used for impregnating and bonding a variety of materials such as glass fibers, rock wool, organic fibers, paper, cloth, wood and inorganic fillers. End uses include thermal and acoustical insulation, battery separators, industrial filters, laminated products, abrasive products and foundry sand molds.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

RESINOX® PHENOLIC RESIN COMPOUND

Supplied in powder form, *Resinox* resin compounds provide excellent bond strength, heat resistance and chemical resistance when cured. They are compounded with fillers such as wood flour, glass fibers and fabric for molding applications. Other uses include the manufacture of bonded fiber pads, grinding wheels, brake linings and foundry sand molds.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

RESINOX® PHENOLIC VARNISH

Resinox varnishes are alcohol solutions of phenolic resin. They are used for impregnating, laminating and coating various substrates and filler materials. End uses include electrical and mechanical grade industrial laminates, decorative laminates and automotive filters. Special heat resistant varnishes are available for use in aerospace components and other high performance systems. Varnishes designed for use in surface coatings impart chemical and solvent resistance in baking finishes for metal surfaces.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

POLYIMIDE RESINS

SKYBOND®

Skybond polyimide varnishes are designed for structural, electrical and specialty applications where extended exposure to high temperature is required. They provide heat resistance, high mechanical strength, excellent electrical properties, fire resistance and low smoke. They are used with reinforcements such as glass cloth or graphite fiber for aircraft components, radome construction and filament winding. *Skybond* also is used in high heat resistant adhesives and foams.

TOWOLDMON0042353
WATER_PCB-00033399

POLYVINYL ACETATES

GELVA® MULTIPOLYMER RESIN SOLUTIONS

Supplied as water-white or slightly yellow solvent solutions, the amounts of *Gelva* resin solids range from 40 to 55% in solvents consisting of ester-aliphatic hydrocarbon blends or alcohol. The resins in *Gelva* multipolymer resin solutions are based on vinyl acetate, acrylic, and other comonomers. Solution viscosities range from 500 to 40,000 cps @ 25°C. The acrylic-containing grades dry to permanently tacky films. The films from all grades are water resistant. *Gelva* multipolymer resin solutions are used to make pressure sensitive coatings and laminating adhesives for difficult-to-bond surfaces. They are also used in formulating surface coatings and for specialty paper coatings.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

GELVA® RESIN EMULSIONS

Supplied as milk-white aqueous dispersions of a full range of PVAc homopolymers and copolymers that provide a choice of viscosity, particle size, molecular weight, emulsifying system, and film forming properties. Emulsions are available that are borax stable, dextrine compatible and with a range of solvent tolerance. They are widely compatible with plasticizers, other film formers, fillers, and colorants. Films and coatings produced by *Gelva* resin emulsions offer a range of usetul properties including excellent adhesion, high tensile strength, hardness, range of heat-sealing temperatures, water resistance and others. They are used broadly as film formers for paints, coatings, binders, adhesives, impregnants.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

GELVA® RESIN SOLUTION

Viscous solvent solution of polyvinyl acetate. *Gelva* V-7-M50 in methyl alcohol. Viscosity 2,500 cps. Total solids 50%. Films and coatings produced from the solution have excellent gloss, clarity and water resistance. It is also noncorrosive and neutral. Used for bonding paper, wood, glass, leather, textiles, ceramics, metal foil and many plastic materials; in shoe cements; in laminating metal foil to cellophane; for preparing plastic wall tile adhesives; and in the paper industry to produce transparent, light and oxygen stable high gloss coatings. Also used as overprint varnishes, greaseproof coatings and pigment binders.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

POLYVINYL ALCOHOL RESINS

GELVATOL® RESINS

White high bulk density powdered resins supplied in a large number of grades in varying degrees of polymerization, per cent hydrolysis and residual acetate content. Resins are water soluble. Viscosities of 4% aqueous solutions range from approximately 2 cps for *Gelvatol* 40-10 to 45 cps for *Gelvatol* 20-90. The resins are nondusting, make clear solutions in water, and cast films are extremely tough with excellent solvent, oil and grease resistance, high tensile strength, and a high degree of impermeability to most gases. Typical applications include dry mix adhesives and building products; textile sizing and finishing; paper coating and sizing; as protective colloids for emulsion polymerization; as binders for china, ceramics, etc.; photosensitive coatings on stencil screens and printing plates; and as water soluble films for packaging soaps, detergents, chemicals, seed, etc.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

POLYVINYL BUTYRALS

BUTVAR® RESIN DISPERSION BR

A milk-white aqueous dispersion of plasticized polyvinyl butyral resin, *Butvar* Dispersion BR has a viscosity of 1500 cps and contains 40 parts plasticizer per 100 parts resin. Air-dried films cast from it are tough, colorless, transparent, dry at room temperature and are unaffected by boiling water. The films are strong and adhere well to a range of surfaces; they resist degradation by water, heat and sunlight. *Butvar* Dispersion BR is used in the textile industry to impart abrasion resistance, durability, strength, slippage control and reduced color crocking to a variety of materials; as abrasion resistant finishes for automobile seat belts and parachute harnesses; as a soft, full-bodied finish for rayon, cotton, or nylon; as a durable, nonraveling finish for filament yarns; and as a finish for curtain and drapery fabrics, glass fabrics, upholstery goods, webbing, awnings, canvas and duck. The resin is also suitable for rug backing, and as greaseproof, washable coatings for wallpaper, window shades and packaging materials. It can be formulated for strippable coatings on metal and other substrates.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

0684270

TOWOLDMON0042354
WATER_PCB-00033400

BUTVAR® RESINS

Butvar polyvinyl butyral resins are white, free-flowing powders supplied in seven resin types or grade forms with various hydroxyl content whose solutions provide a range of viscosities. (Viscosity of a 10% ethanol solution of *Butvar* B-79 is 55 cps; of "B-72", is 1570 cps). *Butvar* resins are generally soluble in alcohols, glycol esters, and certain mixtures of polar and nonpolar solvents. They are compatible with phthalate and phosphate plasticizers, castor oil, and other flexibilizers. The films are colorless and transparent. *Butvar* resins offer a variety of outstanding performance properties: film clarity, adhesion, flexibility, abrasion and water resistance. They are recommended for formulating metal and wood primers; structural and hot melt adhesives; printing inks; and waterproof textile coatings. In surface coatings, *Butvar* resins improve intercoat adhesion, flexibility, impact and abrasion resistance and flow properties. They are recommended for upgrading the coating performance of thermosetting phenolics, ureas, melamines, epoxies, alkyds, polyurethanes, and polyesters.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

SAFLEX® VINYL BUTYRAL FILM

Saflex polyvinyl butyral is a continuous adhesive film — supplied in clear, translucent, tinted or gradated color — for the plastic interlayer in laminated safety glass. It is a tough and resilient laminating material with excellent optics and adhesion to glass. The functional properties provided by *Saflex* include energy absorption, heat insulation, glare control and sound reduction. *Saflex* is used as the interlayer in the manufacture of high-penetration resistant windshields. Other applications include glazings for aircraft, and for architectural security and decorative glass.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

POLYVINYL FORMAL RESINS

FORMVAR® RESINS

Formvar polyvinyl formal resins are white, free-flowing powders supplied in several grades that offer a range of solubility characteristics and solution viscosities. A 5% ethylene chloride solution of *Formvar* 5/95E ranges from 5-11 cps; "15/95E" from 50-80 cps. *Formvar* resins are soluble in phenols, alcohol mixtures, aromatic hydrocarbons and some chlorinated hydrocarbons. They can be plasticized with phthalate, phosphate, glycolate, and many other plasticizers. Each grade has particularly useful properties. *Formvar* 15/95E, for example, is excellent for making tough, heat-resistant enamels for wire used in hermetic systems. The enamels are solderable, bondable, and have high resistance to burn-out and cut-through and excellent solvent resistance to common refrigerants. *Formvar* resins are also suitable for formulating structural adhesives, wash primers, can and drum linings, and wood and knot sealers.

STYRENE PLASTICS/RESINS

LUSTRAN® ABS *molding and extrusion resins*

Lustran ABS acrylonitrile-butadiene-styrene thermoplastics are supplied in a full range of molding and extrusion grades that offer optimum processing characteristics and a range of physical property values in the finished product. *Lustran* plastics are high impact materials with special values for quality applications such as refrigerator inner liners, appliance housings, automotive parts and industrial components.

MOLDING MATERIALS: Supplied in a wide range of balanced rigidity and resilience, grades are available in medium to high impact strength with commensurate rigidity, good gloss, high tensile strength, and abuse resistance. Special grades with unique surface characteristics are available to make "platable" products; the materials provide adhesion of the metal plating and good resistance to thermal cycles.

EXTRUSION COMPOUNDS: Supplied in a series of grades that provide a range of flexibility, resilience, tensile strength, elongation, and abrasion resistance. A special grade is available for extruding low gloss sheet with equivalent other physical properties. In addition a grade which meets UL 94 V-O rating is offered.

MONSANTO PLASTICS & RESINS CO. Locator Key **42a**

LUSTRAN® SAN *molding resins*

Lustran SAN styrene-acrylonitrile molding resins are clear rigid thermoplastics for molding high quality articles requiring transparency, brilliant surface, chemical resistance and stiffness. Supplied as Grade 31 general purpose SAN copolymer offering excellent processability and clarity; and Grades 31-7000 and 31-7042, which are UV stabilized grades.

MONSANTO PLASTICS & RESINS CO. Locator Key **42a**

LUSTREX® POLYSTYRENE *extrusion materials*

Supplied in pellet form for extruding into sheet, film, or profile shapes. Available in several commercial grades ranging from crystal polystyrene through rubber-modified medium and high impact materials. A typical use of the extruded products is thermoformed containers, trays, cups and lids.

MONSANTO PLASTICS & RESINS CO. Locator Key **42a**

LUSTREX® POLYSTYRENE *molding materials*

A broad range of products suitable for molding into articles requiring sharp design detail, high surface luster, good color, dimensional stability, hardness, rigidity and toughness. Supplied in pellet form ranging from transparent crystal polystyrene through rubber-modified materials. The molded articles are widely used in packaging, toy, appliance, photographic, furniture, audio cassette, medical and houseware markets.

MONSANTO PLASTICS & RESINS CO. Locator Key **42a**

LYTRON® LATICES

Lytron emulsion latices are aqueous dispersion of polystyrene and styrene-acrylate copolymers that are used as pigments, binders, saturants or coatings. They are used as opacifiers for liquid detergent systems, bowl cleaners, pharmaceutical products and related items; in textile saturating for making shoe components such as box toes and shoe counters; for stiffening foam rubber; and in water-based paints, specialty paper coatings, pigment vehicles and adhesives. They are also used as plastic pigments in paper coating.

MONSANTO PLASTICS & RESINS CO. Locator Key **43a**

SCRIPSET® RESINS

Styrene-maleic anhydride copolymer resins in powder and liquid form used as protective colloids and film formers. *Scripset* resins promote adhesion and stabilize, harden and thicken aqueous systems. They are alkali-soluble or solvent-soluble for use in adhesives, coatings, and as stabilizers, emulsifying agents, protective colloids and pigment dispersants. *Scripset* resins are used by adhesives manufacturers, textile processors, surface coating manufacturers and producers of emulsion floor waxes and polishes.

RECREATIONAL SURFACES

ASTROTURF* STADIUM SURFACE

An all-weather, synthetic grass-like recreational surface consisting of nylon facing ribbon with weather resistant backing bonded to a shock-absorbing underpad. This system, installed by Monsanto, is ideal for football, baseball, soccer, lacrosse, and other field sports. Material is available in rolls 15 feet wide by up to 700 feet long.

Handling and Maintenance Equipment Machines for handling and maintaining *AstroTurf* surfaces may be special-ordered: line striper, Grasshopper*, Astro Zamboni* water removal machine, water brush, and tote-a-roll.

MONSANTO PLASTICS & RESINS CO. Locator Key **41d**

RUBBER PROCESSING CHEMICALS

ACCELERATORS FOR NATURAL and SYNTHETIC RUBBERS

A-1* THIOCARBANILIDE VULCANIZATION ACCELERATOR *1,3-diphenyl-2-thiourea or N,N'-diphenylthiourea*

Accelerator for fast-curing repair stocks. Accelerator for neoprene latex, natural rubber latex, and cements and an activator for thiazole accelerators. Can be used as accelerator for neoprene. Relatively nondiscoloring and may be used in light colored goods.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

DPG VULCANIZATION ACCELERATOR *diphenylguanidine*

Secondary accelerator in natural and synthetic rubbers with *Santocure*, *Thiofide* and *Thiotax* accelerators. Slow curing primary accelerator for natural rubber.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

METHASAN* VULCANIZATION ACCELERATOR *zinc dimethyldithiocarbamate*

Used as a secondary accelerator for *Thiofide* and *Santocure* accelerators. Gives strong cure activation.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

MONO THIURAD* VULCANIZATION ACCELERATOR *tetramethylthiuram monosulfide*

Primarily a secondary accelerator for *Thiofide*, *Thiotax* and *Santocure* accelerators. Frequently used in camelback stocks, or in other applications where extended storage of uncured stock is required.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

RZ-100* VULCANIZATION ACCELERATOR *N,N-dimethylcyclohexylamine salt of dibutyldithiocarbamic acid*

An accelerator for very fast room or low temperature cures such as required for latex, cements and proofings. Offers good aging performance and practically no staining and discoloration.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

SANTOCURE* VULCANIZATION ACCELERATOR *N-cyclohexyl-2-benzothiazolesulfenamide*

A delayed action accelerator used alone or with a small quantity of secondary accelerator in natural and synthetic tire treads, sidewalls, etc. *Santocure* gives a shorter scorch delay than *Santocure* NS. Slight discoloration in light or white articles at high concentrations. Nonstaining.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

SANTOCURE* MOR VULCANIZATION ACCELERATOR *2-(morpholinothio)benzothiazole*

An excellent accelerator where extended processing safety is required. Used in thick treads and extrusions, stocks with high loadings of furnace blacks such as ISAF or SAF; stocks which are to be stored for long periods such as camelback. Slight discoloration in light or white articles at high concentrations. Nonstaining.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

TOWOLDMON0042359
WATER_PCB-00033405

SANTOCURE® NS VULCANIZATION ACCELERATOR *N-tert-butyl-2-benzothiazolesulfenamide*

A delayed action fast curing accelerator used alone or with a small quantity of secondary accelerator in natural and synthetic tire treads, sidewalls, etc. *Santocure* NS gives processing safety intermediate between *Santocure* and *Santocure* MOR accelerators. Slight discoloration in light or white articles at higher concentrations. Nonstaining.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

THIOFIDE® MBTS VULCANIZATION ACCELERATOR *2,2'-dithiobis (benzothiazole); benzothiazyl disulfide*

Thiofide gives flat, moderately fast cures in both natural rubber and synthetics. It is particularly useful in white or very bright colored stocks. Secondary acceleration is usually required for synthetic rubbers. Nondiscoloring and nonstaining.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

THIOTAX® MBT VULCANIZATION ACCELERATOR *2-mercaptobenzothiazole*

Thiotax gives flat, fast cures over a wide range of curing temperatures in both natural and synthetic rubbers. *Thiotax* is a good secondary accelerator for butyl and EPDM compounds. Nondiscoloring and nonstaining.

®Trademark of Monsanto Limited

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

THIURAD® VULCANIZATION ACCELERATOR *bis(dimethylthiocarbamyl)disulfide; tetramethylthiuram disulfide*

Sulfur bearing accelerator used as a secondary accelerator with *Santocure* or *Thiofide* accelerators in a wide range of products. It is used in sulfurless cures with *Sulfasan* R vulcanizing agent to obtain heat resistant compounds with nitrile stocks. Will cause surface bloom at high use levels.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

VOCOL® VULCANIZATION ACCELERATOR *zinc-o,o-di-n-butylphosphorodithioate*

Low-cost, nonblooming, fast-curing accelerator for EPDM elastomers. Can be used in combination with *Thiofide* accelerator in natural rubber to improve reversion and aging resistance. Nondiscoloring and nonstaining.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

VOCOL® S VULCANIZATION ACCELERATOR *62% Vocol on 38% inert carrier*

A solid form of *Vocol*, 62% active.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

ANTIOXIDANTS, ANTIOZONANTS and ANTIDEGRADANTS

FLECTOL® H ANTIOXIDANT *polymerized 1,2-dihydro-2,2,4-trimethylquinoline*

One of the best all-purpose antioxidants, where a slight buff discoloration of the product can be tolerated. Powerful and nonblooming; resists effect of heat deterioration and normal aging. Combats product degradation promoted by copper and other heavy metals. Suitable for dry rubber and latex.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

FLECTOL® FLAKES ANTIOXIDANT *polymerized 1,2-dihydro-2,2,4-trimethylquinoline*

Has a lower softening point than *Flectol* H. Used in tires, belts, hose, camelback and general mechanicals.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

FLECTOL® ODP ANTIOXIDANT *an octylated diphenylamine*

For protection of rubber against heat deterioration and normal aging. It causes less discoloration than most other full-power antioxidants. It is a good antioxidant for neoprene.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

SANTOFLEX® AW ANTIOXIDANT *6-ethoxy-1,2-dihydro-2,2,4-trimethylquinoline*

Moderate activity antiozonant/antioxidant for both natural and synthetic rubber. Used as a flex-cracking inhibitor, particularly in tire and belting compounds. Strong staining and discoloration.

MONSANTO INDUSTRIAL CHEMICALS CO Locator Key **35a**

SANTOFLEX® DD ANTIOXIDANT *6-dodecyl-1,2-dihydro-2,2,4-trimethylquinoline*

An excellent antioxidant and flex-cracking inhibitor especially for dynamic applications in tire compounds, belting, camelback, hose, mechanicals, and footwear. Also an efficient stabilizer and gel suppressant for SBR stocks during mixing and storage.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

0684276

TOWOLDMON0042360
WATER_PCB-00033406

SANTOFLEX® IP ANTIOZONANT *N-isopropyl-N'-phenyl-p-phenylenediamine*

An efficient antiozonant, antioxidant, flex-cracking and fatigue inhibitor. Used in tires, sidewalls, cushion gums, carcass stocks, camelback, belting, hose, cables, mountings, buffers and mechanical products exposed to static, dynamic and intermittent-dynamic operating conditions.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

SANTOFLEX® LC ANTIDEGRADANT *an antidegradant blend*

An antiozonant blend used in retread rubber to provide excellent low cost protection against oxygen, heat, ozone, and fatigue or flex-cracking.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

SANTOFLEX® 13 ANTIOZONANT *N-(1,3-dimethylbutyl)-N'-phenyl-p-phenylenediamine*

Outstanding antidegradant for all commonly used elastomers. In both natural and synthetic rubber it is a highly effective antioxidant/antiozonant, and flex-cracking inhibitor. Serves as an excellent polymer stabilizer while retaining carryover activity as an antiozonant/antioxidant.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

SANTOFLEX® 77 ANTIOZONANT *N,N'-bis(1,4-dimethylpentyl)-p-phenylenediamine*

An antiozonant for all commonly used elastomers and particularly effective for static applications where it can replace undesirably high loadings of wax. Gives good short-term dynamic protection.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

SANTOFLEX® 134 ANTIOZONANT *an alkylaryl-p-phenylenediamine mixture*

For stabilizing SBR in emulsion polymers and particularly oil extended and oil/black masterbatches where the stabilizer is added with the oil. Effective general purpose antidegradant for tire stocks.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

SANTOFLEX® 134-D ANTIDEGRADANT *a mixture of Santoflex 134 and Santoflex DD*

A low cost antidegradant blend used to give effective oxygen/ozone protection in tire stocks and general mechanicals. Efficient stabilizer for synthetic elastomers. Staining and discoloring.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

SANTOFLEX® 715 ANTIOZONANT *a blend of Santoflex 13 and Santoflex 77 class antidegradants*

A blended antiozonant used in natural and synthetic rubber to achieve effective resistance to ozone fatigue and aging in products submitted to static, dynamic and intermittent-dynamic service conditions.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

SANTOFLEX® 734 ANTIDEGRADANT *a blend of alkylaryl and dialkyl p-phenylenediamines*

Combines protective action of *Santoflex* 13 and *Santoflex* 77 in a single blend. Used in tires and general mechanicals.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

SANTOVAR® A ANTIOXIDANT *2,5-di(tert-amyl) hydroquinone*

For the protection of uncured rubber against oxidation; retains tack in uncured films and tapes.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

SANTOWHITE® 54 ANTIOXIDANT *modified hindered phenol*

Santowhite 54 is a nonstaining, nondiscoloring antioxidant of moderate strength. It is easily emulsified for use in latex and is easily incorporated in dry rubbers.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

SANTOWHITE® 54-S ANTIOXIDANT *solid form of Santowhite 54*

Santowhite 54-S is two parts *Santowhite* 54 and 1 part inert filler used where a solid form of *Santowhite* 54 is preferred.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

SANTOWHITE® MK ANTIOXIDANT *reaction product of 6-tert-butyl-m-cresol and SCl₂*

A nonstaining, nondiscoloring antioxidant used for general purpose protection. A viscous liquid somewhat less active than *Santowhite* Crystals.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

TOWOLDMON0042361
WATER_PCB-00033407

SANTOWHITE® CRYSTALS ANTIOXIDANT
4,4'-thiobis (6-tert-butyl-m-cresol)

For the protection of light colored rubber from oxidation. It is also useful in any rubber product used in contact with surfaces such as lacquer or enamel which are subject to staining by ordinary antioxidants. *Santowhite* Crystals provide excellent protection against normal aging.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

SANTOWHITE® POWDER ANTIOXIDANT *4,4'-butylidenebis (6-tert-butyl-m-cresol)*

High activity antioxidant suitable for all white or light colored products where color is critical; also suitable for latex compounding.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

SALICYLIC ACID, INDUSTRIAL
See Page 38

SANTOGARD® PVI PREVULCANIZATION INHIBITOR *N-(cyclohexylthio)phthalimide*

Santogard PVI is a prevulcanization inhibitor for natural and synthetic rubber. It is used with all sulfenamide or thiazole accelerators to control processing safety with minimal changes in curing characteristics or vulcanizate properties. *Santogard* PVI improves green stock storage stability and can be used to recover scorchy stocks. Useful in a wide variety of applications otherwise temperature limited, such as faster extrusion, hotter processing and single-stage mixing.

STYRENE MONOMER

See Page 44

SULFASAN® R VULCANIZING AGENT

4,4'-dithiodimorpholine

Vulcanizing agent for natural and synthetic rubbers. Stable at processing temperatures but liberates sulfur at curing temperatures. *Sulfasan* R is used as either a total or partial sulfur replacement to produce compounds with excellent heat aging properties and freedom from bloom.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35a**

TRIPOTASSIUM PHOSPHATE

See Page 46

RUBBER PROCESSING EQUIPMENT

MONSANTO® COLD FEED EXTRUDER

Monsanto cold feed extruders produce extrusions of rubber hose, sponge, tire components and profiles. Feed stock is in strip or pellet form. Screw diameters between 1.8 and 10 inches are available. Screw speed ranges between 2 and 72 rmp are achieved. Various screw types and extruder L/D ratios are available. Swing dual head design permits ease of die changing with minimal down time.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO® COLD FEED VACUUM EXTRUDER

A line of cold feed vacuum extruders produce porosity free extrusions of rubber hose, sponge and profiles. Feed stock is in strip or pellet form. Screw diameters between 1.8 and 8 inches are available. screw speed ranges between 2 and 72 rpm are achieved. Various screw types and extruder L D ratios are available. Swing dual head design permits ease of die changing with minimal down time.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO® HOT AIR VULCANIZING TUNNEL

This unit holds microwave-heated extrusions at uniform vulcanizing temperature for desired level of cure. Operating temperatures as high as 500°F can be employed. Twenty air changes per minute prevent hot spots.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO® HOT FEED EXTRUDER

A line of hot feed extruders are available from 2.5 to 10 inch diameters. Dual swing head design permits ease of product change.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO® LCM (LIQUID CURING MEDIUM) UNIT

In this Monsanto LCM unit, the extrusion is submerged in a constant-temperature bath of molten salt for curing. Multiple zoned electric heaters hold the entire bath at uniform curing temperature and eliminate temperature gradients that can cause poor cures.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO® MICROWAVE CONTINUOUS RUBBER VULCANIZER

This unit is placed at the extruder end and quickly and uniformly raises the extrusion temperature to vulcanizing temperatures. Units available in 10 kw increments. The use of 0.8 kw power packs provide flexibility and ease of service. Power packs are compact and low in weight. Easily removed for servicing or replacement by your maintenance personnel; this avoids line stoppages required to service a heavier, in-place power pack. Accommodates single extrusions up to 6 inch diameter or 1¾ x 14".

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO® SPRAY COOLING UNIT

Used in Monsanto's rubber extrusion systems, it has multiple cold water nozzles to chill extrusion. Blow-off ring at exit removes all water from extrusion.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

TOWOLDMON0042363
WATER_PCB-00033409

RUBBER TESTING INSTRUMENTS

CAPILLARY RHEOMETER, AUTOMATIC

Monsanto® Automatic Capillary Rheometer (ACR) is a low cost precision instrument for measuring the flow properties of any viscous material. Test time takes approximately 10 minutes, and is completely automatic. Data is reported directly by display. The ACR gives accurate, reproducible results showing the flow characteristics under typical processing conditions. The unit is designed for quality control as well as research applications. The ACR will provide flow data on thermoplastics, thermosets, textile fiber resins, adhesives, and elastomers over a shear rate range of 10^{-1} to 10^{6} $sec.^{-1}$.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MELT INDEXER

A quality control instrument for the rapid, accurate measurement of the melt indexer of thermoplastics according to the ASTM D-1238 method.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO® CONE-RHEOMETER

The *Monsanto* Cone-Rheometer is a table model rheometer which follows the course of the vulcanization reaction and simultaneously records pressure development associated with the curing and cell development of sponge products. Data are presented on a two-pen strip chart recorder as continuous plots of 1) the stiffness (shear modulus) of the rubber versus time and 2) sample cavity pressure versus time.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO® CURE-SIMULATOR *module unit*

A module unit that gives the Oscillating-Disk Rheometer the capability to cure an elastomeric sample under programmed temperature conditions identical with those of the factory. Particularly useful in curing studies of large cross-section or irregular cross-section rubber articles.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO CURETRON® *data acquisition unit*

Module data acquisition unit that gives the Oscillating-Disk Rheometer the capability to produce numerical quality control data in addition to conventional graphical data. Used for in-process quality control applications in the rubber industry.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO* DIE SWELL DETECTOR, AUTOMATIC

The Automatic Die Swell Detector precisely measures the swell (or memory) character of an extrusion as it exists from the orifice of a capillary rheometer. This measurement indicates the materials' elastic response at conditions similar to processing shear rates and temperatures. The instrument is particularly useful in controlling blow molding, film and profile extrusion and other processes where drawdown character or dimensional stability is critical.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO® DISK RHEOMETER, MODELS R-100 and R-900/750

Floor model or table model rheometers which indicate rubber or rubber-like compound properties such as thermoplasticity, processing safety, cure rate, optimum cure time, and ultimate state of cure. Data are presented as a continuous plot of compound physical properties vs. cure time in accordance with ASTM D-2084-73P.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO® FATIGUE-TO-FAILURE TESTER *flex tester*

Bench model fatigue tester which measures the ultimate fatigue life of cured rubber compounds at selected strain amplitude ratios. Data are presented as the number of cycles to failure.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO® MOONEY COMPUTER

The Mooney Computer is an add-on data processing unit used with the Monsanto custom and standard Mooney Viscometers. Mooney data is automatically displayed on a teletype printer.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO® MOONEY VISCOMETER

Three basic models of shearing disk viscometers designed for operation in accordance with ASTM D 1646, BS 1673 and ISO R 289. All measure plasticity of unvulcanized elastomers and processing performance of compounded elastomers.

The Compact Mooney Viscometer offers simplicity of operation, minimum of floor space. Equipped with direct digital readout for viscosity measurements. Strip chart recorder with 12 speeds available.

The Standard Mooney Viscometer has flat bed recorder, push-button temperature selector, and solid state components.

0684280

TOWOLDMON0042364
WATER_PCB-00033410

Custom Mooney Viscometers are tailored to customer's individual laboratory or factory needs and offers compatibility with existing computers.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO* POWER INTEGRATOR

The power integrator is an instrument that continuously measures and displays the total power used by an energy consuming process such as Banbury, mill or other mixing system. Power integration can be used to standardize and control the work input to a batch of rubber. This technique produces more uniform mixing and consequently greater homogeneity in the finished rubber products.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO* PROCESSABILITY TESTER

The Processability Tester combines an advanced design constant rate capillary rheometer with laser die swell and stress relaxation measurement capability. The instrument modular package includes a microprocessor, servohydraulic drive and precision temperature control. The instrument defines and predicts material characteristics important to the total production process. Tests are conducted at conditions of temperature and shear rate equivalent to those experienced in the actual production process.

Typical uses include viscosity and shear stress characterization, correlative studies of mixing and extruder operation, dimensional stability, homogeneity, carbon black loading analysis, stress relaxation characterization, and scorch determination.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO® RHEOMETER COMPUTER

The Rheometer Computer can be attached to Monsanto Oscillating-Disk Rheometers (MP-V, TM-100 and R-100 models) to automatically print out curemeter data. Data, including sample identification, are printed on a page printer in accordance with international standard methods.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO® TENSOMETER, MODEL T-500 *tensile tester*

A floor model universal tester with variable crosshead drive and comprehensive stress/strain electronic recording system giving results in real engineering terms on a strip chart recorder. Designed to meet the requirements of BS 903, Part A2, 1971; ASTM D 412, ASTM 638, DIN 53504, ISO/R37, etc.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO® TENSOMETER, MODEL W *tensile tester*

A table model, horizontal, motor driven tensile tester with load capacity of 4,000 lbs. (1814.4 kg). Seven calibrated spring beams are provided for various ranges. A drum type autographic recorder automatically plots stress/strain. A second recorder allows modulus testing.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **35b**

MONSANTO* X-RAY UNIT *(three different units available)*

The Monsanto Air-Inflated X-ray System is designed to inspect passenger and light truck tires, bead-to-bead, for all cord materials. The unit employes tire automatic conveyance and sequencing.

The Universal Tire X-ray System is a manual laboratory system to inspect cured and green tire construction. The Monsanto patented lighthouse x-ray tube enables the operator to inspect the complete tire from bead-to-bead with consistent geometric presentation.

The 10/27/750 tire x-ray is designed for automated production line x-ray inspection of passenger, truck, bus, and aircraft tires. The solid state process controller is programmed to automatically optimize tread, bead, and sidewall x-ray geometry viewing for each individual tire size and construction.

STABLE ISOTOPES

Monsanto supplies stable isotopes of the noble gases, carbon, sulfur, nitrogen, bromine, chlorine, and oxygen. Stable carbon isotopes are available in five forms. All of these products are nonradioactive, i.e., stable. They are of controlled purity with various enrichment levels. For each isotope the degree of enrichment is specified as well as minimum purity. The gaseous products are supplied in glass ampoules and steel cylinders, liquids in glass bottles and solids in plastic bottles.

The following stable isotopes are available for physical, chemical, biological research; for industrial uses in nuclear technology; in medical research and diagnostics; for cryogenics and physics studies; in various nuclear physics devices; and in tracer studies of chemical and biological process, where a radioactive isotope would be undesirable. Further information may be obtained upon request.

Stable ARGON Isotopes (gas purity 99.5%)

Stable Isotope:	Ar-36	Ar-38	Ar-40
Isotopic Enrichment	99.5%	95%	99.95%
Purity:	99.5%	99.5%	99.5%

SURFACE ACTIVE AGENTS, DETERGENTS and BLEACHES

BLEACHING COMPOUNDS

ACL[1] 56, 59, 60, 66, 85 SANITIZER and BLEACHING COMPOUNDS

ACL 56 sodium dichloroisocyanurate dihydrate is a 56% available chlorine product. It is used in detergent applications, bleaches, and pool disinfection.

ACL 59 potassium dichloroisocyanurate is a 59% available chlorine product that is used for swimming pool disinfection and sanitizing. It is also used as an oxidizer in mechanical dishwashing compounds and other detergent applications.

ACL 60 sodium dichloroisocyanurate is a 62% available chlorine product. It is used in detergent applications, bleaches and pool disinfection.

ACL 66 (monotrichloro) tetra-(monopotassium dichloro)-penta-isocyanurate is a 66% available chlorine product used in sanitizers and detergent applications.

ACL 85 trichloroisocyanuric acid is a 90% available chlorine product. It is used for pool disinfection in compacted forms, commercial bleaches and scouring powders.

MONSANTO INDUSTRIAL CHEMICALS CO. — Locator Key **36a**

DETERGENT INTERMEDIATES

ALKYLATE 215, 225 and 230 *alkylbenzene-biodegradable*

These alkylates are supplied as intermediates for the manufacture of anionic liquid and solid detergents. The three grades are monoalkylbenzene mixtures of different molecular weights.

MONSANTO INDUSTRIAL CHEMICALS CO. — Locator Key **31a**

SURFACE ACTIVE AGENTS-ANIONIC

DDBSA 99-B *alkylbenzene sulfonic acid-biodegradable*

DDBSA 99-B is produced by the sulfonation of refined linear alkylbenzene with SO_3 and contains a minimum amount of free sulfuric acid. It can be neutralized with various bases and is used as an intermediate for the preparation of neutral alkylaryl sulfonates. Primary use is in liquid detergents.

MONSANTO INDUSTRIAL CHEMICALS CO. — Locator Key **31a**

MONSANTO[2] H-230 AROMATIC NAPHTHA

A coproduct of the manufacture of linear alkylbenzene, *Monsanto* H-230 is a mixture of alkylated benzenes. Available in commercial quantities, the product may be sulfonated and is commonly used for the manufacture of surfactants, oil additives, and other specialty chemicals.

SURFACE ACTIVE AGENTS-NONIONIC

STEROX® DF SURFACTANT *dodecylphenol-ethylene oxide condensate (alkylaryl polyoxyethylene ether)*

Sterox DF is a liquid nonionic surface active agent. It is primarily designed as an intermediate for sulfation to produce a high foaming active ingredient for liquid detergents. It also shows considerable potential as a paper rewetting agent.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

STEROX® DJ SURFACTANT *dodecylphenol-ethylene oxide condensate (alkylaryl polyoxyethylene ether)*

Sterox DJ is a liquid nonionic surface active agent based on dodecylphenol and 9-10 moles of ethylene oxide. It is a general purpose surfactant with a much lower degree of foaming in comparison to other alkylphenol based nonionics. It is an extremely effective detergent and can be compounded with phosphates and the usual detergent builders for a wide range of applications including textile, paper, leather processing; metal cleaning; emulsifiable toxicant concentrates; latex formulations; and in chemical processing.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

STEROX® ND SURFACTANT *nonylphenol-ethylene oxide condensate*

Sterox ND is a liquid nonionic surface active agent which contains an average of four moles of ethylene oxide. It exhibits excellent oil soluble surfactant properties, and it is highly soluble in nonpolar solvents. *Sterox* ND can be used as an intermediate in the production of sulfated surfactants.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

STEROX® NE SURFACTANT *nonylphenol-ethylene oxide condensate*

Sterox NE is a liquid nonionic surface active agent with an average of five moles of ethylene oxide. It has excellent oil soluble surfactant properties and is used as an active ingredient in gasoline deicer additives. In addition, it is used as a wetting agent and as an intermediate in the production of sulfated surfactants.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

STEROX® NJ SURFACTANT *nonylphenol-ethylene oxide condensate (alkylaryl polyoxyethylene ether)*

Sterox NJ is a general purpose nonionic surfactant. It has proven effective in a wide range of applications including dry and liquid detergents in textile, paper, and leather processing; for metal cleaning; and in latex formulations.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

STEROX® NK SURFACTANT *nonylphenol-ethylene oxide condensate (alkylaryl polyoxyethylene ether)*

Sterox NK is a nonionic, general purpose surface active agent containing an average of 10.5 moles of ethylene oxide. *Sterox* NK is an excellent water-soluble wetting agent and finds wide application in textile processing. It is also used to formulate general purpose dry and liquid detergents, household cleaners and industrial cleaners.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **31a**

STEROX® NM SURFACTANT *nonylphenol-ethylene oxide condensate*

Sterox NM is a nonionic surface active agent with an average of 12.5 moles of ethylene oxide. It is especially well suited for modern liquid detergent formulations because of its superior high foaming characteristics and an odor level which is significantly lower than that of competitive surfactants. *Sterox* NM exhibits excellent detersive properties when compared to a lauryl sulfate standard, and it is an effective wetting agent.

TEXTILE INTERMEDIATES

ADIPIC ACID, TECHNICAL GRADE
See Page 53

ADIPONITRILE

Adiponitrile is supplied to nylon 6,6 fiber manufacturers as an intermediate which is used in the production of hexamethylenediamine.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

CYCLOHEXANOL/CYCLOHEXANONE MIXTURE

Used in conversion to adipic acid or separation into cyclohexanol and cyclohexanone.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

HEXAMETHYLENEDIAMINE (HMD)

Supplied to fiber and plastics manufacturers as a basic intermediate used in nylon 6,6 production. Other uses for HMD include manufacture of nylon 6,9, 6,10 and 6,12 resins, polyurethanes via hexamethylenediisocyanate, wet strength resins, boiler feedwater additives and polyamide adhesives.

MONSANTO CHEMICAL INTERMEDIATES CO. Locator Key **21a**

HEXAMETHYLENEDIAMMONIUM ADIPATE

Nylon 6,6 salt supplied to fiber and plastics manufacturers as a 50% aqueous solution and used in polymerization to nylon 6,6 polymer.

WATER TREATING CHEMICALS

DEQUEST® 2000 *phosphonate*

Used in any aqueous system for the prevention of scale formation or to inhibit precipitation in water treating applications. A particularly effective additive in industrial cleaner formulations for the control of extraneous metal ions and to improve soil or scale removal. Used as a scale control agent in oil production.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

DEQUEST® 2006 *phosphonate*

Used in neutral or alkaline systems for the prevention of scale or to prevent mineral precipitation. Agent for deflocculating clays, cements, resins, pigments and the like. Effective additive for alkaline cleaners (such as bottle washing formulas or dairy cleaners) or in general-purpose detergents.

MONSANTO INDUSTRIAL CHEMICALS CO. Locator Key **36a**

DEQUEST® 2010 *phosphonate*

Used in scale prevention and corrosion inhibition for industrial water treatment, and to control metal ions in aqueous systems.
