You have my approval to publish said paper with the changes I have indicated on the attached copy.

Summarizing these changes, they relate to the following factors:

1. We should strongly indicate that the new fluids are recently introduced and more commercial life experience is needed.

2. The Law Department should carefully check all wording because of PCB lawsuits. With the slight changes I have made, in my opinion, we are okay.

3. I have commented somewhat on the commercial and availability aspects.

4. I have taken out some repetition and redundancy.

In overall summary, I feel the paper is timely, informative and needed. It's presented in a straightforward, excellent manner.
