intervals until the first flower bud shows color. We water just often enough to keep the plants pleasantly moist but not wet and on hot, summer days we sprinkle the foliage to cool the plants.

Light, lots of it, and a tiny bit of filtered sunlight is the biggest factor in getting good flower spikes. Plants that fail to produce spikes get too little, rarely too much light. Divided plants frequently fail to flower the following spring due to late repotting or slow recovery from the shock of repotting but so long as the foliage is lush and green this is nothing to worry about.

contrasts, special effects, etc. There tare 16 pages of full color photographs, to clearly depict the subject; two-color art work appears throughout the book plus some 136 black and white photographs. Here is an easy guide to gorgeous garden color 12 months of the year.

Sunset's "Garden Pools, Fountains and Waterfalls" is a new book that presents all the basic information on building the outdoor displays Western homes are noted for. It is a thorough guide which presents ideas and actual plans, with more than one hundred and thirty photographs, for all types of pools and waterfalls.
