Attention: Mr. R. E. Gealer

Dear Roy:

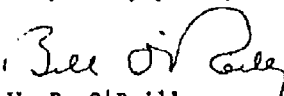

First, let me thank you, Arnie and Marvin for the time afforded by you all to John Axelson, Mike Donovan and me on the 19th of last month. If you got from it a fraction of what we did, it was time well spent.

Since then, Mike has asked me to send you copies of the presentations made by Johns-Manville and Caterpillar Tractor Company before The Pollution Control Board of the State of Illinois at a hearing held in Chicago last October 15th.

I think the presentations are excellent and I know you will enjoy reading them and having them in your file. I was told after the meeting by a person who was present, that the Pollution Control Board personnel impressed very favorably those in attendance as being fair and open minded and concerned with gathering the facts in the matter. Evidence was taken but no conclusions or rulings have been issued. The Board's in search of definite information and scientific evidence on which rulings can be based, and we can be sure that when and if any rulings are published we will hear of them.

If there is anything we can do for you on your group, just let me know.

Very truly yours,

W. P. O'Reilly
