INSTRUCTIONS (References are to the Internal Revenue Code, unless otherwise noted)

1. Taxable Years Beginning Before July 1, 1950.—If the taxable year begins prior to July 1, 1950, and ends after March 31, 1951, the tax should be computed by using Sections (A), (B), and (C). In computing the tentative taxes under Sections (A), (B), and (C) the net income is not recomputed. For computation of credit in the case of dividends received from certain foreign corporations, see instructions (pages 7 and 8) for 1951 Form 1120.

In the case of a public utility corporation which has paid dividends on its preferred stock, line 9 in Section (A) provides for the allowance, in computing surtax net income, of an amount equal to the dividends paid on certain preferred stock. On line 16 in Section (B) there should be entered an amount equal to 31 percent of the lower of (*a*) the amount of dividends paid on certain preferred stock of a public utility corporation or (*b*) the excess of the public utility corporation's adjusted net income over its dividends received credit. On line 25 in Section (C) there should be entered an amount equal to 27 percent of the lower of (*a*) or (*b*).

A Western Hemisphere trade corporation should compute its tax in Section (A) without computing a surtax, and its normal tax should be computed without regard to any credit under section 26 (*i*). On line 17 in Section (B) there should be entered an amount equal to 31 percent of the normal-tax net income computed without regard to such amount. On line 26 in Section (C) there should be entered an amount equal to 27 percent of such normal-tax net income.

The credits allowed in computing surtax net income and the surtax rate provided in the Excess Profits Tax Act of 1950 are not effective with respect to the computations of the credits and tax under Section (B).

2. Taxable Years Beginning On or After July 1, 1950.—(*a*) *Taxable years beginning before April 1, 1951.*—If the taxable year begins on or after July 1, 1950, and ends after April 1, 1951, the tax should be computed by using Sections (D) and (E). In computing the tentative taxes under (D) and (E) the net income is not recomputed. For computation of credit in the case of dividends received from certain foreign corporations, see instructions (pages 7 and 8) for 1951 Form 1120.

In the case of a public utility corporation which has paid dividends on its preferred stock, there should be entered on line 3 in Section (D) an amount equal to 30 percent of the lower of (*a*) the amount of dividends paid on certain preferred stock of a public utility corporation or (*b*) the excess of the public utility corporation's adjusted net income over its dividends received credit. There should be entered on line 12 in Section (E) an amount equal to 27 percent or the lower of (*a*) or (*b*).

A Western Hemisphere trade corporation should enter on line 4 in Section (D) an amount equal to 30 percent of the normal-tax net income computed without regard to such amount. On line 13 in Section (E) there should be entered an amount equal to 27 percent of such normal-tax net income.

(*b*) *Taxable Years Beginning On or After April 1, 1951, but Before January 1, 1952.*—If the taxable year begins on or after April 1, 1951, and before January 1, 1952, the combined normal tax and surtax should be computed in Section (E). For computation of credit in the case of dividends received from certain foreign corporations, see instructions (pages 7 and 8) for 1951 Form 1120. In the case of a public utility corporation or a Western Hemisphere trade corporation, the credit on line 12 or 13 is computed in the same manner as outlined for such line in subparagraph (*a*).

3. Alternative Capital Gains Tax.—(*a*) *In General.*—In any case in which a corporation has an excess of net long-term capital gains over net short-term capital losses, the alternative tax under Section 117 (*c*) (1) will be an amount equal to the sum of the portions of the tentative taxes determined under Section 108 (*f*) or (*g*) by computing each tentative tax in accordance with the alternative tax computation provided in Section 117 (*c*) (1), regardless of whether each tentative tax so computed on the alternative basis is larger or smaller than the tentative tax computed without regard to Section 117 (*c*) (1). A statement showing the computation of the alternative tax should be attached to separate Schedule D (Form 1120).

(*b*) *Tentative Taxes for Taxable Years Beginning Before July 1, 1950.*—A tentative partial tax may be determined for each period by subtracting the excess of net long-term capital gains over net short-term capital losses for the taxable year *from*—

(1) lines 5 and 10 and using the tax rates shown in lines 6 and 11, Section (A);
(2) line 18 and using the tax rates shown in lines 19 and 20, Section (B);
(3) line 27 and using the tax rates shown in lines 28 and 29, Section (C).

The tentative alternative tax for each period will be the amount of each tentative partial tax so computed plus, for each such tax, 25 percent of the excess of net long-term capital gains over net short-term capital losses. The portion of each tentative alternative tax may be determined by multiplying such tax by the number of days in the applicable period and dividing by the number of days in the taxable year. (See lines 13, 22, and 31.) The sum of the portions of each tentative alternative tax so computed will be the tax under Section 117 (*c*) (1) and should be entered on line 33 if less than the total tax on line 32.

(*c*) *Tentative Taxes for Taxable Years Beginning Before April 1, 1951.*—A tentative partial tax may be determined for each period by subtracting the excess of net long-term capital gains over net short-term capital losses for the taxable year from—

(1) line 5 and using the tax rates shown in lines 6 and 7, Section (D);
(2) line 14 and using the tax rates shown in lines 15 and 16, Section (E).

The tentative alternative tax for each period will be the amount of each partial tax so computed plus, for each such tax, 25 percent of the excess of net long-term capital gains over net short-term capital losses. The portion of each tentative alternative tax may be determined by multiplying such tax by the number of days in the applicable period and dividing by the number of days in the taxable year. (See lines 9 and 18.) The sum of the portions of each tentative alternative tax so computed will be the tax under Section 117 (*c*) (1) and should be entered on line 21 if less than the total normal tax and surtax on line 19.

(*d*) *Alternative Tax for Taxable Years Beginning On or After April 1, 1951, and Before January 1, 1952.*—A partial tax may be determined by subtracting the excess of long-term capital gains over net short-term capital losses for the taxable year from line 14 and using the tax rates shown in lines 15 and 16, Section (E). The alternative tax will be the partial tax plus 26 percent of such excess.

4. Use of Form 1120 (1950 or 1951) and Form 1120FY (1951–1952).—A corporation having a taxable year (*a*) beginning before July 1, 1950, and ending after March 31, 1951, (*b*) beginning on or after July 1, 1950, and ending after March 31, 1951, or (*c*) beginning on or after April 1, 1951, must use Form 1120FY (1951–1952) to compute the normal tax and surtax for its taxable year. In such cases the tax computations on page 3 of Form 1120 for 1950, Form 1120FY, and Schedule FY (Form 1120) should be disregarded. Corporations having taxable years beginning in 1950 should use Form 1120 for 1950 to compute the net income, filling in all applicable items and schedules. Corporations having taxable years beginning in 1951 should use Form 1120 for 1951. Form 1120FY (1951–1952) should be filled in, attached to, and made a part of such form.

In the case of a taxable year ending after March 31, 1951, but before October 1, 1951, the date of filing the return and paying the tax imposed by chapter 1 for such taxable year is January 15, 1952. Even though a taxpayer has filed a corporation income tax return on or before October 20, 1951 (date of enactment of the Revenue Act of 1951), the Act requires every corporation (except those specifically exempted by law) to file a return after the date of enactment of the Act. Accordingly, no return of such a corporation with respect to taxes imposed by chapter 1 for such taxable year which was filed on or before October 20, 1951, will be considered a return for such year. The total tax for such taxable year is due and payable on January 15, 1952, or, at the election of the corporation, may be paid in four installments (first two installments, 30 percent of the tax, and last two installments, 20 percent of the tax). All payments of tax made on or before October 20, 1951, with respect to such taxable year, to the extent not credited or refunded, will be applied to the January 15, 1952, installment and any excess will be applied to succeeding installments.

Schedule EP-3.—ALTERNATIVE EXCESS PROFITS CREDIT OF REGULATED PUBLIC UTILITIES (Section 448)

NOTICE OF RESERVATION

The taxpayer hereby elects to compute its excess profits credit based on the historical invested capital under Section 458 I.R.C., conditional upon the event that the use of such credit will produce the lowest excess profits tax or highest unused excess profits credit.

While this return is not filled out for all the credits which may be available to the taxpayer, the right is nevertheless reserved, and election is made, to pay tax under whatever credit, as later determined by the Bureau or otherwise, results in the lower tax.

INSTRUCTIONS

(References are to the Internal Revenue Code, unless otherwise noted)

Schedule EP (Form 1120) FY is to be used by fiscal year taxpayers in conjunction with Schedule EP (Form 1120) for 1951. If the taxable year begins in 1950 it should accompany Form 1120 for 1950. If the taxable year begins in 1951 it should accompany Form 1120 for 1951.

If the taxable year begins before July 1, 1950, only Parts I, II, and IV (if applicable) are to be used. If the taxable year begins after June 30, 1950, only Parts I, III, and IV (if applicable) are to be used. The same rules apply to short taxable years.

Part I is designed for computation of the portion of the average base period net income which is to be taken into account in computing the excess profits credit based on income.

Parts II and III, respectively, are designed for the computation of maximum tax for taxable years which begin before July 1, 1950, and taxable years which begin after June 30, 1950.

Part IV is designed for computation of the alternative maximum tax for the taxable year, if such year is one of the first five taxable years of the corporation. It should be used, where applicable, in conjunction with Parts II and III in accordance with the above instructions.

The figures determined by reference to this form are to be entered on Schedule EP (Form 1120) as indicated in specific instructions below.

SPECIFIC INSTRUCTIONS

The following instructions are numbered to correspond with line numbers in each part of this schedule

PART I.—1. The average base period net income to be entered on this line is the figure determined by reference to Schedule EP (Form 1120) on line 30, 36, or 45 of Schedule EP–2; line 9 or 15, Schedule EP–5 (A); line 16, 20 (or line 28 if line 30 is applicable), Schedule EP–5 (B); line 9, Schedule EP–5 (C); line 8, Schedule EP–5 (D); line 7, Schedule EP–5 (E) whichever is applicable; or if the credit is determined under any of the subsections of section 459, the amount determined under such subsection.

7. This is the amount of the average base period net income to be taken into account in computing the excess profits credit based on income. The amount determined on this line should be entered in the appropriate line of Schedule EP (Form 1120) depending upon the method of computing the excess profits credit. If the excess profits credit is computed under the general average method (section 435 (d)), enter on line 47, Schedule EP–2. If computed under the provisions relating to growth (section 435 (e)), enter on line 46, Schedule EP–2 (A). If computed on Schedule EP–5, enter on line 10 or 16, Schedule EP–5 (A); line 17, 21 (or line 30 if applicable), Schedule EP–5 (B); line 10, Schedule EP–5 (C); line 9, Schedule EP–5 (D); or line 8, Schedule EP–5 (E), whichever is applicable. If computed under section 459, use the amount determined on this line in the computations made under the provisions of that section.

PART II.—1. *Excess Profits Net Income.*—This is the figure determined on line 26, page 1, Schedule EP (Form 1120) for 1951. In the case of a short taxable year this figure should be the annualized excess profits net income as provided under the regulations.

2. *Adjusted Excess Profits Net Income.*—This is the figure determined on line 30, page 1, Schedule EP (Form 1120). If the taxable year begins before July 1, 1951, and ends after June 30, 1951, and the excess profits credit based on income is used, the adjusted excess profits net income is to be computed with reference to such part of the average base period net income as is determined under Part I of this schedule.

12. If a consolidated return, reduce the amount on this line by an amount which bears the same ratio (not more than 100 percent) to the 2 percent increase in surtax imposed by section 141 (c) as the consolidated excess profits net income bears to the consolidated surtax net income.

16. The figure determined on this line should be entered on line 34, page 1, Schedule EP (Form 1120). If Part IV of this schedule is applicable, the figure on this line should be entered on line 12 (*c*) of that part. If this is a short taxable year, see section 433 (a) (2) for reduction of this figure before entering it on Schedule EP (Form 1120).

PART III.—1. *Excess Profits Net Income.*—See Instruction 1, Part II.

2. *Adjusted Excess Profits Net Income.*—See Instruction 2, Part II.

10. If a consolidated return, see Instruction 12, Part II.

14. See Instruction 16, Part II, of this schedule.

15. See Instruction 16, Part II of this schedule.

PART IV.—See instructions for line 33, Schedule EP–1 (1951 Instructions for Schedule EP (Form 1120)) with respect to application of this schedule.

1. *Excess Profits Net Income.*—See Instruction 1, Part II.

2. See instruction for line 33, Schedule EP–1 (Instruction for Schedule EP (Form 1120)), for determination as to which taxable year is involved and for applicable percentage to be entered on line (*a*).

12. (*d*) The amount computed on this line should be entered on line 34, page 1, Schedule EP (Form 1120).

PROPERTY AT CHEMICAL AND PIGMENT PLANT, ST. HELENA, MD.			
To adjust the book value of plant assets as of November 1, 1926 to the appraised sound value, entry made August 16, 1932:			
Land	26,874.49	-o-	26,874.49
Buildings	15,582.66	1,317.53	14,265.13
Railroad sidings	250.75	9.11	241.64

	Excess of Gross Book Value	Reserve for Depreciation
Land	$ 26,874.49	$ -o-
Buildings	61,329.00	45,746.34
Railroad sidings	426.40	175.65
Machinery and equipment	47,925.79	211,469.25
Furniture and fixtures	744.49	1,234.64
	$137,300.17	$258,625.88

Note:
The above adjustment reduces the book value to appraised sound values. Depreciation on the books represents depreciation on appraised value since date of appraisal, and the total depreciation taken in the tax return represents depreciation based on cost. The apparent overdepreciation in Machinery and Equipment and Furniture and Fixtures is due to the fact that the depreciation taken on the books and in the tax returns to October 31, 1931 was based on cost. Rates as agreed upon by the examiner in reviewing the years from October 31, 1931 to October 31, 1936, will be applied on the excess gross book value until the costs have been fully depreciated.
