A. D. Childs **REDACTED** vs.
Sherwin-Williams Co.

Dear Al:

REDACTED

The attached interrogatories relate to a death claim which is being pursued by the widow of who was at one time employed at our Newark Plant. The files indicate that died of bronchogenic carcinoma and generalized carcinomatosis. The widow apparently is alleging in her petition that she is entitled to Workmen's Compensation Death Benefits because her husband had worked with carcinogenic inducing materials while employed at our plant.

The enclosed interrogatories were therefore filed by the attorneys for the claimant in connection with her claim against S-W. We have worked with Liberty Mutual and Tom DeCastro, Personnel Manager of our Newark Plant, in developing answers to the interrogatories. We have also collaborated with Phil Cooper, the Plant Manager of the Newark Plant, and the Director of the Newark Laboratories.

Liberty Mutual has developed responses which they feel are appropriate to the interrogatories and have asked that we sign them.

Would you therefore be kind enough to indicate to us approval to publish the responses to the interrogatories as Liberty Mutual has developed them and also suggest to us who might be the appropriate person in our Company to sign these interrogatories.

Thank you for your good help.
