Guard Against Dirt

An enemy against which there never can be any armistice is dirt in the home. The strongest weapon against dirt is an immediate supply of hot water.

Stain Is Well-Liked As Furniture Finish

One of the most popular finishes for furniture is wood stain.

The grain of wood is made of hard and soft areas. The soft portions absorb the stain more quickly than the hard ones. When the stain has set long enough to permit its soaking into the wood, sugar the excess off the surface. Then the hard areas show the rich richness of the grain, while the soft areas are subdued. Experiments on a piece of scrap wood are a safe way to paint stains.

Fancy Paper Project

Fancy gift wrap paper holders can make an attractive waste basket.

Paste the paper to the exterior of a large popcorn or potato chip can. Use two colors, if you like, and add a design of cutout paper. Varnish the paper.
