Subject BRITE X-2 Sand Date 9/MAR/78

MESSAGE:

We sent you, via UPS, the box of Brite X-2 micaceous sand discussed on the phone 7MAR78. It looks pretty good to me from visual and microscopic examination. I think I would prefer the -40 mesh mat'l. as a substitute for Windsor #36 tale. As you can see from my scribbled notes on Sue Miller's memo, there is a decent savings involved. I'll appreciate your evaluation of the sample(s).
