Mr. R. E. Grantham
Route 1
Douglas, Georgia 31533

Dear Mr. Grantham:

Our inspector has collected two samples of your milk and both samples show an excess of polychlorinated biphenyls. The laboratory reports are enclosed.

I understand you do not have silage in the silo at the present time. Please contact the silage company and ask them to repair your silo and do not put any silage in the silo to feed dairy cattle until it is repaired.

If I can be of any assistance please do not hesitate to call on me.

Yours truly,

Gene Dally

Gene Dally
Assistant Division Director-Milk
