Extra Value

DUO-WHITE is cheaper than white lead, spreads farther and hides better. TRIPLE A SUPERB ENAMEL is the whitest of the whites, stays white and keeps its lustre. Try P-A BRAND WHITE FLAT WALL PAINT against any other flat you know—you be the judge. TRIPLE A SUPERB VARNISH is alkali, acid and alcohol proof. P-A BRAND HOUSE PAINT, one coat over DUO-WHITE PRIMER gives three coat wear and appearance with two coats. Order any item listed in our catalog—AT OUR RISK! Satisfaction guaranteed.

PROPER MIXING TO GET BEST RESULTS

Paints and Enamels must be carefully and completely mixed before they are used. A large proportion of painting difficulties are due to insufficient mixing which makes the paint uneven in body or color.

Follow These Steps and You'll Get Uniform, Smooth Spreading Paint!

ONE-GALLON CANS

1. Pour off one-quarter contents into another clean can.
2. Loosen with paddle settled pigments.
3. Mix thoroughly using a lifting and beating motion with the paddle.
4. Gradually add liquid poured off and mix as described in step 3.
5. Complete mixing by pouring the paint back and forth from one can into the other.

FIVE-GALLON CANS

Repeat steps described for One-Gallon Cans.

BARRELS AND HALF BARRELS

1. Remove barrel head.
2. Push paddle to the bottom, keeping flat side against the barrel.
3. Pull handle of the paddle toward you, lifting pigment almost to the surface, twist paddle to right and throw pigment off.

Repeat this operation and continue until you are sure the paint is mixed to an even consistency.
