Subject: Alcoa/Sandow Betterment Program
Asbestos
Bechtel Job # 16567
Letter BMA - 60
File

Dear Mr. DeBoalt,

In order to address the asbestos issue at Sandow, the following recommendations are offered for your consideration.

1. Establish a small joint committee to deal with all asbestos issues on the entire site.

2. Establish a short range program to fulfill the immediate needs of the following:

   a) Identify the areas containing asbestos and determine the replacement costs, any effects upon operations or existing conditions, and when would the replacement be most advantageous.

   b) Obtain a contractor to handle all asbestos removal for the interum period.

   c) Develop a training program to convey certain do's and don't's to the plant and contractor personnel.

   d) Develop a procedure to identify asbestos samples here on site. This would include the set up and operations of the microscope that was purchased during the recent unit outages.

? 3. Establish a long range program to remove and replace all asbestos in all areas of the site.

I don't believe we need to go into a whole sale change out at this ~~to~~ time. I believe the remainder of the letter is valid. DB

Please review these recommendations and advise if you should need any further information or clarification. Bechtel is standing by to assist you with any portion of this asbestos abatement situation including a complete analysis as offered by our corporate safety department.

Very truly yours,

BECHTEL WESTERN POWER CORPORATION
