  Environmental Control

COPIES TO
- R. E. Kasberger
  R. Braud

SUBJECT
- ASBESTOS SUBSTITUTES - JOHNS-MANVILLE
  File 710.503.3 SEND TO

The Gage Company, located in Parkersburg, West Virginia, is one of the largest distribution centers for Johns-Manville products in this area. Since Kaiser already has a substantial account with The Gage Company, Mr. Lloyd Morgan, area manager, has offered his company's services in investigating suitable asbestos replacements for our specific applications. Mr. Morgan will also be accompanied by Mr. Jay Dawgiello from the Pittsburgh office who was formerly a technical representative for Johns-Manville.

A tentative meeting has been scheduled for February 26, 1976, from 1:00 to 3:00 p.m. in the ROB Conference Room. I would like to request that both OSHA committees meet in a joint session for this presentation in order to consider those materials which would be applicable for both sides.

Please contact those members of the committee who will be directly responsible for the adoption of asbestos substitutes, and ask them to attend the meeting.
