Subject: Pending Requests for Determination

This email is to bring to your attention two requests for a determination previously filed with the EPA regarding new technology equipment (designed for forestry and agricultural uses and to address the clean-up of wood debris) that remain pending at the Agency.

As outlined in the requests, this equipment provides multiple benefits to air quality and the environment and is far superior to current alternatives, but has encountered issues with regard to appropriate classification and permitting. The requests were made in 2020 to both the Office of Air and Radiation and the Office of Land and Emergency Management regarding approaches that could potentially resolve uncertainty in the classification of this equipment.

We recognize that this is currently an extremely busy period for EPA, but would welcome the opportunity to discuss matters contained within the requests with the appropriate officials and staff at your earliest convenience.

Should you have any questions concerning the requests or need additional information regarding same, please do not hesitate to contact me.
