yes.

Q All right. Do you agree with that statement?

A No.

Q And on what basis do you disagree with that statement?

A Well, this goes back to the concerns related to what's coming out of the Mount Sinai Group at this point in time with Selikoff as the leader of the pack.

But in the studies that, at least three of the studies or at least two of the studies that they published, they were using, I believe, x-ray diffraction.

I'd have to go back and double -- they were using methodologies that to the rest of the scientific community studying fibers and fiber measurements was not an accepted methodology.

Q Okay. What methodologies were they using that were unacceptable?

A I believe it was x-ray diffraction.

Q All right. And what was x-ray diffraction used for?

A Analysis of a whole bunch of
