Attached for your approval is the start-up budget for the expansion of Aroclor facilities at the W. G. Krummrich Plant (CEA 1800).

The total capital investment is $1,500,000. Start-up expenses are estimated at $115,000 or 7.7% of the investment. This is lower than typical start-up costs because of the experience level of personnel involved and the fact that no performance volume or yield variances are anticipated.

W. A. Kuhn
