MONTEAGLE SILO CO.
MONTEAgle Tenn.

DEAR Sirs:
MR. John Housley Requested that I Send you the Information the we, Tenn. Dept. of Agriculture, have pretaining to his Silo Containing P.C.B.
Please find enclosed reports dated 12-21-73, 2-22-74, 2-22-74 and 12-4-74, As you can See Report R-3112 indicates the the milk Collected from mr. Housley's Bulk TANK Contained 2.48 P.P.m. P.C.B. (Fat BASIS) This is very Close to Tolerance As you can see.
The next Step WAS to get Some Silage from the Silo which WAS Suspect and also Some SCRAPEings from the Silo's WALLS you will find results on Report R3338 & R3339.
ANother Sample WAS Run on Whole milk BASIS 12-4-74 The results being R-3721 Report.

DSW 325494

STLCOPCB4075585

We have worked with mr. Housley on this matter very closely, And At A meeting in Nashville with the Commissioner of Agriculture & our Direcor on Dec 12 1974, This Problem was discussed & MR. Housley agreeed to have the Silo fixed when it was empty which is now. I Understand that you as A Company have worked with the farmers in other areas to correcte their problem (as well as yours with this Silo that was plastered with this Compound.

I would Suggest that you contact mr. Housley At once and see what you can work out as to fixing Silo before he fills Again

If You have any other Questions please Let me Know.
