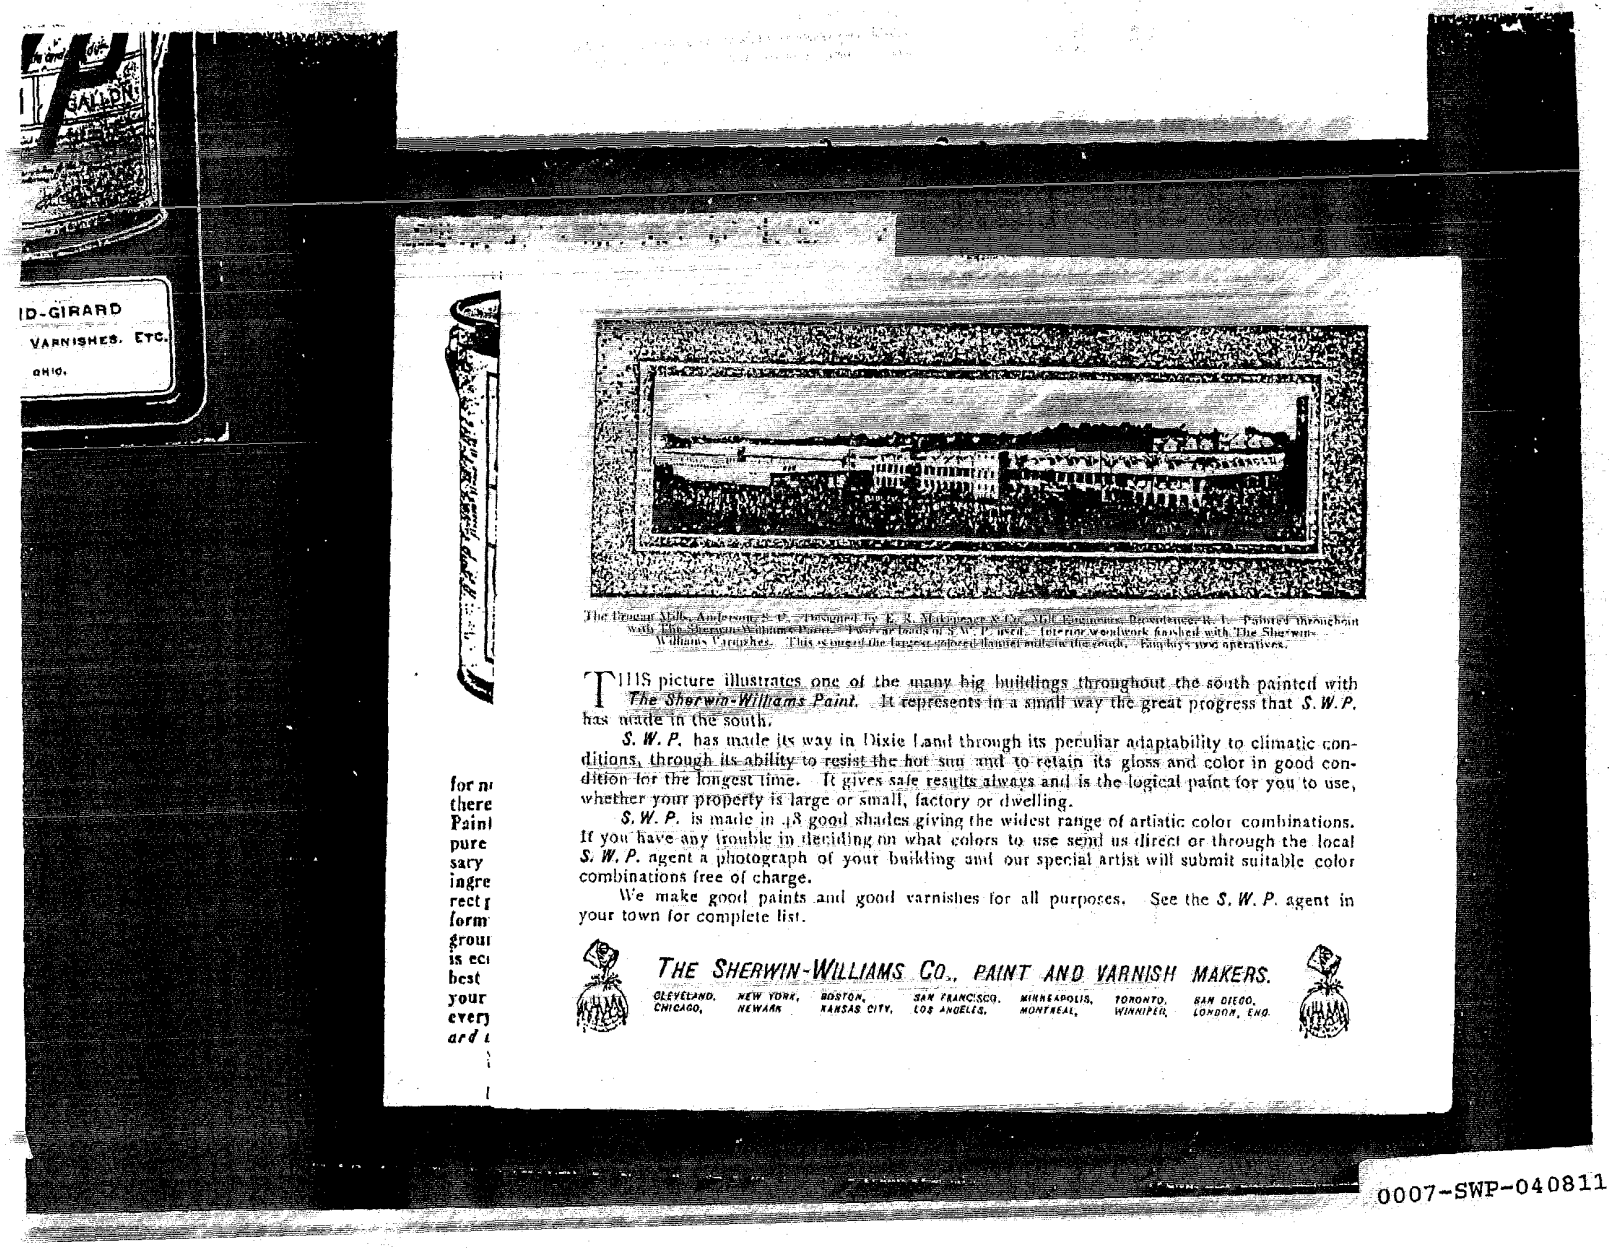
N780AN



The Dunean Mills, Anderson, S. C. Designed by E. R. Mathewson & Co., 701 Exchange, Providence, R. I. Painted throughout with The Sherwin-Williams Paints. Two acr loads of S. W. P. used. Interior woodwork finished with The Sherwin-Williams Varnishes. This is one of the largest colored flannel mills in the south. Employs 1000 operatives.

THIS picture illustrates one of the many big buildings throughout the south painted with *The Sherwin-Williams Paint.* It represents in a small way the great progress that *S. W. P.* has made in the south.

S. W. P. has made its way in Dixie Land through its peculiar adaptability to climatic conditions, through its ability to resist the hot sun and to retain its gloss and color in good condition for the longest time. It gives safe results always and is the logical paint for you to use, whether your property is large or small, factory or dwelling.

S. W. P. is made in 48 good shades giving the widest range of artistic color combinations. If you have any trouble in deciding on what colors to use send us direct or through the local *S. W. P.* agent a photograph of your building and our special artist will submit suitable color combinations free of charge.

We make good paints and good varnishes for all purposes. See the *S. W. P.* agent in your town for complete list.
