Deepwater, New Jersey 08023

Dear Mrs. Keller:

Enclosed is literature on our Aroclor 6000 series products, which were formulated specifically as replacements for our Aroclor 1200 series (i.e., Aroclor 1248) products. As discussed, the Aroclor 1200 series is no longer available. Recent studies indicate this uniquely stable chemistry is persistent, thus we have discontinued their sale.

The Aroclor 6000 series is not PCB formulated. The physical properties of either Aroclor 6062 or Aroclor 6050 are similar to Aroclor 1248. We suggest you review these properties. Ultimate suitability of either Aroclor 6062, Aroclor 6050 or another product will depend upon your application.

If you have questions please contact Mr. Paul Craska, Monsanto Company, 2005 Concord Pike, Fairfax, Wilmington, Delaware 19803 (302-658-6531), or me in St. Louis. In the interim we are holding your order for four 55 gallon drums (Order No. MD 968979 M).

Very truly yours,

Donald R. Pogue
Product Supervisor
