C. F. REINHARDT, M.D.
HASKELL LABORATORY FOR
TOXICOLOGY AND INDUSTRIAL MEDICINE
WILMINGTON, DELAWARE

I have been looking at a number of different pulmonary function analyzers. There are so many of them available and the physicians with whom I have spoken that specialize in the field of respiratory diseases seem to have different opinions. In August, 1972, I received the attached communication from Dr. Zahn. What analyzers did you test at the Haskell Laboratory to arrive at your conclusion?

A. E. Givens, M. D.
