SUBJECT: FIBERFILL

REFERENCE: Your memo 8/19/66 to W.F.Waychoff

TO : R. E. KELLY

The dermatitis problem Bill Boyer at Fiberfill has discussed with you could be a threat to the Aroclor business at this account.

In your discussions with Mr. Boyer you may have already covered this point, but is it possible that the fiberglass used in the dry blending operation could be the source of the dermatitis problem? Is this the type of dermatitis that might be caused from an irritant such as fiberglass?
